Handbook of Urban and Community Forestry in the Northeast John E. Kuser, 2013-11-11 With the emergence of urban and community forestry as the fastest growing part of our profession in the last 15 years the need for a book such as this inevitably developed The Society of American Foresters urban forestry working group counts 32 or more universities now offering courses in this subject and the number is growing For the last several years I have coordinated a continuing education urban forestry course at Rutgers for nonmatriculated students Registrants have included arborists shade tree commissioners landscape architects city foresters environmental commissioners park superintendents and others whose jobs involve care and management of trees The course was started by Bob Tate in 1980 around a core of managerial subjects such as inventories budgets and public relations After Bob left in 1984 to join Asplundh and later to start his own prosperous business in California the course languished after it exhausted the local market for those subjects

Roman times when amenity trees were first planted in Britain caring for those trees has required specialist skills This is mainly because of the challenges of successfully integrating large trees into the urban environment and the risks involved in working with them often at height and in close proximity to people buildings and roads But who are the people with the specialist expertise to care for our amenity trees While professionals such as horticulturists landscape architects conservationists and foresters have a role to play it is the arboriculturists who are the tree experts For centuries arboriculture was often synonymous with forestry or considered an aspect of horticulture until it emerged in the nineteenth century as a separate discipline There are now some 22 000 people employed in Britain s arboricultural industry including practical tree surgeons and arborists local authority tree officers and arboricultural consultants This is the first book to trace the history of Britain s professional tree experts from the Roman arborator to the modern chartered arboriculturist It also discusses the influences from continental Europe and North America that have helped to shape British arboriculture over the centuries The Tree Experts will have particular appeal to those interested in the natural and built environment heritage landscapes social history and the history of gardening
