## **Archaeologies Of The Middle East:**

**Archaeologies of the Middle East** Susan Pollock, Reinhard Bernbeck, 2009-02-09 Archaeologies of the Middle East provides an innovative introduction to the archaeology of this fascinating region and a window on both its past and present Written by some of the top archaeologists of the Middle East scholars from diverse backgrounds with a wide range of interests and intellectual approaches Coverage spans 100 000 years from the Paleolithic to Hellenistic times Explores the connections between modern day politics and the social context of archaeological practice and various underutilized approaches to archaeological interpretation Designed for student use Archaeologies of the Middle East Susan Pollock, Reinhard Bernbeck, 2005 Archaeology is a social practice that is thoroughly embedded in the contemporary world This is nowhere clearer than in the Middle East a region that is today an epicenter of political and economic tensions and ongoing conflicts Archaeologies of the Middle East Critical Perspectives provides an innovative introduction to the archaeology of this fascinating region spanning 100 000 years from the Paleolithic to Hellenistic times and a window on both its past and present Archaeologies of the Middle East explores the connections between modern day politics and the social context of archaeological practice and underutilized approaches to archaeological interpretation such as examining the ways in which scholars write about the past the portrayal of archaeology in the news media and the impacts of and on archaeology in volatile political situations Written by some of the top archaeologists of the Middle East this volume integrates scholars from diverse backgrounds with a wide range of interests and intellectual approaches to their research Archaeologies of the Middle East is carefully designed for student use and focuses on key themes and time periods rather than offering a static overview of the history of the region Living Communities and Their Archaeologies in the Middle East Rick Bonnie, Marta Lorenzon, Suzie Thomas, 2023-09-29 This volume presents theoretical ideas case studies and reflective insights on community archaeology across the Middle East with contributions by scholars working in and from Iraq Israel Jordan Palestine and Syria The chapters represent a multitude of insights from contemporary public archaeology practice drawing on theoretical frameworks and discussing the realities of challenges and opportunities presented by opening up archaeological experiences to wider publics in different social and political settings In particular the volume focuses on the following three themes 1 defining and reflecting on community in community archaeology 2 which archaeologies to employ in community archaeology and 3 measuring the success and failure of community archaeology In addressing these issues the chapters reflect different historical trajectories and cultures that enable us to find similarities and differences in the theory and practice of community archaeology In more recent decades a shift has been noticed among both national authorities and foreign archaeological expeditions with more emphasis on local heritage experiences However this frequently took the form of guiding and introducing communities to their heritage Only more recently local voices have become more heard in definitions of heritage and decisions on preservation matters with more projects tying these voices into their research objectives This volume

presents several projects that combine postcolonial approaches citizen participation and community work across the Middle East By focusing especially on this geographical area the volume also reflects upon the current state of public and community archaeology in this unique and complex region adding to the already rich literature from the rest of the world The Middle East has a long fascinating but also complicated history of archaeological investigation deeply entrenched in colonization and more recently in the decolonization process The involvement and social values of the associated communities have often been overlooked in academic discussions This book aims to redress that imbalance and present original research that reflects on the work of current scholars and practitioners and draws similarities and differences from diverse cultures

**Finding Antiquity, Making the Modern Middle East** Guillemette Crouzet, Eva Miller, 2025-06-12 This volume presents innovative studies of how the emerging disciplines of archaeology and ancient history shaped the modern Middle East and how they were in turn shaped by competing visions and agendas of empires and new nations The Middle East was a region constructed through its putatively unique relationship to the whole world's past and its special relevance for the destiny of empires and nations Over the course of the nineteenth and early twentieth centuries European empires fought for influence and control over this cradle of civilization empire and monuments and local powers and people in the Middle East worked with and against these historical and heritage frameworks in their own quests for self determination In this volume contributors from the fields of history archaeology and heritage explore how historical consciousness about the Middle East was contested in the nineteenth and early twentieth century through excavation and interpretation of the past Chapters span West Asia and North Africa covering Turkey Iraq Iran Syria Lebanon Israel Palestine Egypt and Tunisia and the imperial history of Britain France Germany and the Ottoman Empire The result is an original contribution to our understanding of the origins and influence of Middle Eastern archaeology which resonates today in contemporary discussions on heritage discourses and practices

**Controlling the Past, Owning the Future** Ran Boytner, Lynn Swartz Dodd, Bradley J. Parker, 2010-12-15 What are the political uses and misuses of archaeology in the Middle East In answering this question the contributors to this volume lend their regional expertise to a variety of case studies including the Taliban's destruction of Buddhas in Afghanistan the commercialization of archaeology in Israel the training of Egyptian archaeology inspectors and the debate over Turkish identity sparked by the film *Troy* among other provocative subjects Other chapters question the ethical justifications of archaeology in places that have alternative engagements with the material past In the process they form various views of the role of the archaeologist from steward of the historical record to agent of social change The diverse contributions to this volume share a common framework in which the political use of the past is viewed as a process of social discourse According to this model political appropriations are seen as acts of social communication designed to accrue benefits to particular groups Thus the contributors pay special attention to competing social visions and the filters these impose on archaeological data But they are also attentive to the potential consequences of their own work Indeed as the editors remind us people's

lives may be affected sometimes dramatically because of the material remains that surround them Rounding out this important volume are critiques by two top scholars who summarize and synthesize the preceding chapters **In Search of Kings and Conquerors** Lisa Cooper, 2016-01-28 At the height of her career Bell journeyed into the heart of the Middle East retracing the steps of the ancient rulers who left tangible markers of their presence in the form of castles palaces mosques tombs and temples Among the many sites she visited were Ephesus Binbirkilise and Carchemish in modern day Turkey as well as Ukhaidir Babylon and Najaf within the borders of modern Iraq Lisa Cooper here explores Bell's achievements emphasizing the tenacious inquisitive side of her extraordinary personality the breadth of her knowledge and her overall contribution to the archaeology of the Middle East Featuring many of Bell's own photographs this is a unique portrait of a remarkable life **Historical Archaeology and Heritage in the Middle East** Ruth Young, 2019-01-14 Landlord villages dominated Iranian land tenure for hundreds of years whereby one powerful landlord owned the village structures surrounding farmland and to all intents and purposes the village occupants themselves a system that in some cases remained in place up to the 1979 Islamic Revolution In Oman mud brick oases were home to most of the rural population right up until Sultan Qaboos came to power in 1970 and required inhabitants of mud brick houses to relocate into new concrete block buildings Historical Archaeology and Heritage in the Middle East explores these everyday rural communities in Iran and Oman in the 19th and 20th centuries through a combination of building analysis excavation artefact analysis and ethnographic interviews Drawing on the results of original field projects the book considers new ways of exploring traditional lifeways giving voice to hitherto largely ignored sections of the population and offers new and different ways of thinking about how these people lived and what shaped their lives and the impact of major political and social changes on them Place memory and belonging are considered through the lens of material culture within these villages The first of its kind the book brings together methodologies research questions and themes that have never been used or addressed in the Middle East Helping to establish historical archaeology in the Middle East and providing new ways in which the memorable quotidian past can be exploited for its social and economic value in contemporary community and heritage developments it is an ideal resource for students scholars and practitioners of historical archaeology and heritage of and in the Middle East

*Archaeology Under Fire* Lynn Meskell, 2002-01-04 The Middle East and Eastern Mediterranean are some of the most politically charged regions in which archaeology is implicated Historically they played a formative role in the birth of archaeology as a discipline *Archaeology Under Fire* addresses archaeology's role in current political issues including the ethnic cleansing in the Balkans the division of Cyprus and the continued destruction of Beirut The contributors consider the positive role of the past as a means of reconciliation whether it be in Turkey Israel and the Gulf They advocate a responsible global archaeology and an awareness of contemporary issues can only enhance this aim *Archaeological History Of The Ancient Middle East* Jack Finegan, 2019-03-14 The purpose of this book is to give a connected account of what happened in

the ancient Middle East primarily on the basis of the records and monuments that have been recovered through the work of modern archaeology The Middle East is defined as extending from the western border of Egypt 20 degrees E to the eastern border of Iran 60 degrees E      **Living Communities and Their Archaeologies in the Middle East** Rick Bonnie, Marta Lorenzon, Suzie Thomas, 2023-09-29 Scholars working in and from Iraq Israel Jordan Palestine and Syria present theoretical frameworks case studies and reflective insights on community archaeology projects across the Middle East
