Archaeology And Language Iv:

Archaeology and Language IV Roger Blench, Matthew Spriggs, 2014-04-10 This volume provides a challenging variety of case studies which demonstrate how global patterns of language distribution and change can be interwoven to produce a rich historical narrative

Archaeology, Language, and the African Past R. Blench, 2006-06-22 Archaeology Language and the African Past is an overview of theories and methods a fusion of African linguistics and archaeology Roger Blench provides a comprehensive look at the history of all African language families incorporating the latest linguistic classifications current evidence from archaeology genetic research and recorded history This original and definitive volume examines the economic culture of the continent from major crops and plant life to animals and livestock from a multi dimensional perspective It provides students of linguistics archaeology and anthropology with a critical discussion on the history of African languages and the cultures they articulate

ARCHAEOLOGY AND CAPITALISM Yannis Hamilakis, Philip Duke, 2007-12-15 The editors and contributors to this volume focus on the inherent political nature of archaeology and its impact on the practice of the discipline Pointing to the discipline s history of advancing imperialist colonialist and racist objectives they insist that archaeology must rethink its muted professional stance and become more overtly active agents of change The discipline is not about an abstract archaeological record but about living individuals and communities whose lives and heritage suffer from the abuse of power relationships with states and their agents Only by recognizing this power disparity and adopting a political ethic for the discipline can archaeology justify its activities Chapters range from a critique of traditional ethical codes to examinations of the capitalist motivations and structures within the discipline to calls for an engaged emancipatory archaeology that improves the lives of the people with whom archaeologists work A direct challenge to the discipline this volume will provoke discussion disagreement and inspiration for many in the field

Archaeology and Language R. Blench, Matthew Spriggs, 1999

Historical Linguistics and the Comparative Study of African Languages Gerrit J. Dimmendaal, 2011-06-08 This advanced historical linguistics course book deals with the historical and comparative study of African languages The first part functions as an elementary introduction to the comparative method involving the establishment of lexical and grammatical cognates the reconstruction of their historical development techniques for the subclassification of related languages and the use of language internal evidence more specifically the application of internal reconstruction Part II addresses language contact phenomena and the status of language in a wider cultural historical and ecological context Part III deals with the relationship between comparative linguistics and other disciplines In this rich course book the author presents valuable views on a number of issues in the comparative study of African languages more specifically concerning genetic diversity on the African continent the status of pidginised and creolised languages language mixing and grammaticalisation

The Origins of the Irish J. P. Mallory, 2013-04-01 An essential new history of ancient Ireland and the Irish written as an engrossing detective story About eighty million people today can trace their descent back

to the occupants of Ireland But where did the occupants of the island themselves come from and what do we even mean by Irish in the first place This is the first major attempt to deal with the core issues of how the Irish came into being J P Mallory emphasizes that the Irish did not have a single origin but are a product of multiple influences that can only be tracked by employing the disciplines of archaeology genetics geology linguistics and mythology Beginning with the collision that fused the two halves of Ireland together the book traces Ireland's long journey through space and time to become an island The origins of its first farmers and their monumental impact on the island is followed by an exploration of how metallurgists in copper bronze and iron brought Ireland into increasingly wider orbits of European culture Assessments of traditional explanations of Irish origins are combined with the very latest genetic research into the biological origins of the Irish

Cyclical Change Continued Elly van Gelderen, 2016-03-09 This book presents new data and additional questions regarding the linguistic cycle The topics discussed are the pronoun negative negative existential analytic synthetic distributive determiner degree and future modal cycles The papers raise questions about the length of time that cycles take the interactions between different cycles the typical stages and their stability and the areal factors influencing cycles The languages and language families that are considered in depth are Central Pomo Cherokee Chinese English French Gbe German Hmong Mien Maipurean Mayan Mohawk Mon Khmer Niger Congo Nupod Quechuan Sino Tibetan Tai Kadai Tuscarora Ute and Yoruboid One paper covers several of the world's language families Cyclical change connects linguists working in various frameworks because it is exciting to find a reason behind this fascinating phenomenon *Quantitative Approaches to Linguistic Diversity* Søren Wichmann, Anthony Grant, 2012 Quantitative methods in linguistics which the protean American structuralist linguist Morris Swadesh introduced in the 1950s have become increasingly popular and have opened the world of languages to interdisciplinary approaches The papers collected here are the work not only of descriptive and historical linguists but also statisticians physicists and computer scientists They demonstrate the application of quantitative methods to the elucidation of linguistic prehistory on an unprecedented world wide scale providing cutting edge insights into issues of the linguistic correlates of subsistence strategies rates of birth and extinction of languages lexical borrowability the identification of language family homelands the assessment of genealogical relationships and the development of new phylogenetic methods appropriate for linguistic data Originally published in *Diachronica* 27 2 2010

Celtic from the West 3 John T. Koch, Barry Cunliffe, 2016-09-01 The Celtic languages and groups called Keltói i.e. Celts emerge into our written records at the pre Roman Iron Age The impetus for this book is to explore from the perspectives of three disciplines archaeology genetics and linguistics the background in later European prehistory to these developments There is a traditional scenario according to which Celtic speech and the associated group identity came in to being during the Early Iron Age in the north Alpine zone and then rapidly spread across central and western Europe This idea of Celtogenesis remains deeply entrenched in scholarly and popular thought But it has become increasingly difficult to reconcile

with recent discoveries pointing towards origins in the deeper past It should no longer be taken for granted that Atlantic Europe during the 2nd and 3rd millennia BC were pre Celtic or even pre Indo European The explorations in Celtic from the West 3 are drawn together in this spirit continuing two earlier volumes in the influential series *Spirits and Ships* Andrea Aciri, Roger Blench, Alexandra Landmann, 2017-03-10 This volume seeks to foreground a borderless history and geography of South Southeast and East Asian littoral zones that would be maritime focused and thereby explore the ancient connections and dynamics of interaction that favoured the encounters among the cultures found throughout the region stretching from the Indian Ocean littorals to the Western Pacific from the early historical period to the present Transcending the artificial boundaries of macro regions and nation states and trying to bridge the arbitrary divide between inherently cosmopolitan high cultures e g Sanskrit Sinitic or Islamicate and local or indigenous cultures this multidisciplinary volume explores the metaphor of Monsoon Asia as a vast geo environmental area inhabited by speakers of numerous language phyla which for millennia has formed an integrated system of littorals where crops goods ideas cosmologies and ritual practices circulated on the sea routes governed by the seasonal monsoon winds The collective body of work presented in the volume describes Monsoon Asia as an ideal theatre for circulatory dynamics of cultural transfer interaction acceptance selection and avoidance and argues that despite the rich ethnic linguistic and sociocultural diversity a shared pattern of values norms and cultural models is discernible throughout the region
