Archaeology And The Modern World Colonial Transcripts In South Africa And The Chesapeake:

Archaeology and the Modern World Martin Hall, 2015-12-22 Archaeology and the Modern World advances a new controversial theory of historical archaeology Using new case studies Martin Hall evaluates the major theoretical traditions in historical archaeology while contributing significantly to the debate In this study the author places an emphasis on material culture and the recent past to bring to light a picture of an unstable and violent early colonial world in which material culture played a crucial mediating role

Archaeology and the Modern World Martin Hall, 2000 Starting with voyages of discovery in the 16th and 17th centuries and continuing through to the present when the material world is represented on the Internet this volume reveals a critical dimension of historical archaeology

International Handbook of Historical Archaeology Teresita Majewski, David Gaimster, 2009-06-07 In studying the past archaeologists have focused on the material remains of our ancestors Prehistorians generally have only artifacts to study and rely on the diverse material record for their understanding of past societies and their behavior Those involved in studying historically documented cultures not only have extensive material remains but also contemporary texts images and a range of investigative technologies to enable them to build a broader and more reflexive picture of how past societies communities and individuals operated and behaved Increasingly historical archaeology refers not to a particular period place or a method but rather an approach that interrogates the tensions between artifacts and texts irrespective of context In short historical archaeology provides direct evidence for how humans have shaped the world we live in today Historical archaeology is a branch of global archaeology that has grown in the last 40 years from its North American base into an increasingly global community of archaeologists each studying their area of the world in a historical context Where historical archaeology started as part of the study of the post Columbian societies of the United States and Canada it has now expanded to interface with the post medieval archaeologies of Europe and the diverse post imperial experiences of Africa Latin America and Australasia The 36 essays in the International Handbook of Historical Archaeology have been specially commissioned from the leading researchers in their fields creating a wide ranging digest of the increasingly global field of historical archaeology The volume is divided into two sections the first reviewing the key themes issues and approaches of historical archaeology today and the second containing a series of case studies charting the development and current state of historical archaeological practice around the world This key reference work captures the energy and diversity of this global discipline today

The Archaeology of Capitalism in Colonial Contexts Sarah K. Croucher, Lindsay Weiss, 2011-08-10 The Archaeology of Capitalism in Colonial Contexts Postcolonial Historical Archaeologies explores the complex interplay of colonial and capital formations throughout the modern world The authors present a critical approach to this topic trying to shift discourses in the theoretical framework of historical archaeology of capitalism and colonialism through the use of postcolonial theory This work does not suggest a new theoretical framework as such but rather suggests the importance of revising key theoretical terms employed

within historical archaeology arguing for new engagements with postcolonial theory of relevance to all historical archaeologists as the field de-centers from its traditional locations Examining case studies from North America South America the Caribbean Africa Australia the Middle East and Europe the chapters offer an unusually broad ranging geography of historical archaeology with each focused on the interplay between the particularisms of colonial structures and the development of capitalism and wider theoretical discussions Every author also draws attention to the ramifications of their case studies in the contemporary world With its cohesive theoretical framework this volume is a key resource for those interested in decolonizing historical archaeology in theory and praxis and for those interested in the development of modern global dynamics

Historical Archaeology in South Africa Carmel Schrire, 2018-12-13 This volume documents the analysis of excavated historical archaeological collections at the Cape of Good Hope South Africa The corpus provides a rich picture of life and times at this distant outpost of an immense Dutch seaborne empire during the contact period Representing over three decades of excavation conservation and analysis the book examines ceramics glass metal and other categories of artifacts in their archaeological contexts An enclosed CD includes a video reconstruction plus a comprehensive catalog and color illustrations of the artifacts in the corpus The parallels and contrasts this volume reveals will help scholars studying the European expansion period to build a richer comparative picture of colonial material culture

The Routledge Handbook of Archaeology and Globalization Tamar Hodos, 2016-11-18 This unique collection applies globalization concepts to the discipline of archaeology using a wide range of global case studies from a group of international specialists The volume spans from as early as 10 000 cal BP to the modern era analysing the relationship between material culture complex connectivities between communities and groups and cultural change Each contributor considers globalization ideas explicitly to explore the socio cultural connectivities of the past In considering social practices shared between different historic groups and also the expression of their respective identities the papers in this volume illustrate the potential of globalization thinking to bridge the local and global in material culture analysis The Routledge Handbook of Archaeology and Globalization is the first such volume to take a world archaeology approach on a multi period basis in order to bring together the scope of evidence for the significance of material culture in the processes of globalization This work thus also provides a means to understand how material culture can be used to assess the impact of global engagement in our contemporary world As such it will appeal to archaeologists and historians as well as social science researchers interested in the origins of globalization

Desire Lines Noëleen Murray, Nick Shepherd, Martin Hall, 2007-08-07 This ground breaking new work draws together a cross section of South African scholars to provide a lively and comprehensive review of the under researched area of heritage practice following the introduction of the National Heritage Resources Act Looking at the daily heritage debates from naming streets to projects such as the Gateway to Robben Island Desire Lines addresses the innovative strategies that have emerged in the practice of defining identifying and developing heritage sites In a unique multi disciplinary approach contributions are

featured from a broad spectrum of fields including the built environment and public culture and education Showcasing work from tour operators and museum curators alongside that of university based scholars this book is a comprehensive and singularly authoritative volume that charts the development of new and emergent public cultures in post apartheid South Africa through the making and unmaking of its urban spaces This pioneering collection of essays and case studies is an indispensable guide for those working within or studying heritage practice

Archaeology Barry W. Cunliffe, Wendy Davies, Colin Renfrew, 2002 Twenty six leading scholars from around the world have come together to celebrate the strengths the energies and the sheer intellectual excitement of their discipline They unashamedly proclaim that over the last hundred years archaeology has transformed itself from a genteel antiquarian pursuit deeply rooted in the classical tradition to a rigorous and demanding discipline spanning the humanities and the sciences yet at the same time one widely accessible to the public at large The contributors show how our understanding of the past has changed reveal the exciting ideas under current debate and offer their visions of the future The result is a remarkable overview of world archaeology focusing on new and unexpected themes at the cutting edge of the discipline

The Archaeology of Colonialism Barbara L. Voss, Eleanor Conlin Casella, 2011-10-31 This volume examines human sexuality as an intrinsic element in the interpretation of complex colonial societies While archaeological studies of the historic past have explored the dynamics of European colonialism such work has largely ignored broader issues of sexuality embodiment commemoration reproduction and sensuality Recently however scholars have begun to recognize these issues as essential components of colonization and imperialism This book explores a variety of case studies revealing the multifaceted intersections of colonialism and sexuality Incorporating work that ranges from Phoenician diasporic communities of the eighth century to Britain's nineteenth century Australian penal colonies to the contemporary Maroon community of Brazil this volume changes the way we understand the relationship between sexuality and colonial history

Historical Archaeology Martin Hall, Stephen W. Silliman, 2009-02-09 This volume offers lively current debates and case studies in historical archaeology selected from around the world including North America Latin America Africa the Pacific and Europe Authored by 19 experts in the field Explores how historical archaeologists think about their work piecing together information from both material culture and documents in an attempt to understand the lives of the people and societies they study Engages with current theory in an accessible manner Truly global in its approach but avoids subsuming local experiences of people into global patterns Summarizes not only the current state of historical archaeology but also sets the course for the field in decades to come
