Archaeology And Ancient History Breaking Down The Boundaries:

Archaeology and Ancient History Eberhard W. Sauer, 2004-07-31 This collection of pieces from an international range of contributors explores in detail the separation of the human past into history and archaeology

Archaeology and History in Roman, Medieval and Post-Medieval Greece Linda Jones Hall, 2016-12-05 The essays in *Archaeology and History in Roman Medieval and Post Medieval Greece* honor the contributions of Timothy E Gregory to our understanding of Greece from the Roman period to modern times Evoking Gregory's diverse interests the volume brings together anthropologists art historians archaeologists historians and philologists to address such contested topics as the end of Antiquity the so called Byzantine Dark Ages the contours of the emerging Byzantine civilization and identity in post Medieval Greece These papers demonstrate the continued vitality of both traditional and innovative approaches to the study of material culture and emphasise that historical interpretation should be the product of methodological self awareness In particular this volume shows how the study of the material culture of post Classical Greece over the last 30 years has made significant contributions to both the larger archaeological and historical discourse The essays in this volume are organized under three headings Archaeology and Method the Archaeology of Identity and the Changing Landscape which highlight three main focuses of Gregory's research Each essay interlaces new analyses with the contributions Gregory has made to our understanding of Medieval and Post Medieval Greece Read together these essays not only make a significant contribution to how we understand the post Classical Greek world but also to how we study the material culture of the Mediterranean world more broadly

Housing in the Ancient Mediterranean World J. A. Baird, April Pudsey, 2022-07-21 One of the greatest benefits of studying the ancient Greek and Roman past is the ability to utilise different forms of evidence in particular both written and archaeological sources The contributors to this volume employ this evidence to examine ancient housing and what might be learned of identities families and societies but they also use it as a methodological locus from which to interrogate the complex relationship between different types of sources Chapters range from the recreation of the house as it was conceived in Homeric poetry to the decipherment of a painted Greek lekythos to build up a picture of household activities to the conjuring of the sensorial experience of a house in Pompeii Together they present a rich tapestry which demonstrates what can be gained for our understanding of ancient housing from examining the interplay between the words of ancient texts and the walls of archaeological evidence

People and Spaces in Roman Military Bases Penelope M. Allison, 2013-10-31 This study uses artefact distribution analyses to investigate the activities that took place inside early Roman imperial military bases Focusing especially on non combat activities it explores the lives of families and other support personnel who are widely assumed to have inhabited civilian settlements outside the fortification walls Spatial analyses in GIS type environments are used to develop fresh perspectives on the range of people who lived within the walls of these military establishments the various industrial commercial domestic and leisure activities in which they and combat personnel were

involved and the socio spatial organisation of these activities and these establishments The book includes examples of both legionary fortresses and auxiliary forts from the German provinces to demonstrate that more material cultural approaches to the artefact assemblages from these sites give greater insights into how these military communities operated and demonstrate the problems of ascribing functions to buildings without investigating the full material record

Roots of Nationhood: The Archaeology and History of Scotland Louisa Campbell, Dene Wright, Nicola A. Hall, 2018-10-31 12 papers from specialists covering a wide array of time periods and subject areas this volume explores the links between identity and nationhood throughout the history of Scotland from the prehistory of northern Britain to the more recent heralding of Scottish identity as a multi ethnic construction and the possibility of Scottish independence

The Oxford Handbook of Early Christian Archaeology David K. Pettegrew, William Rodney Caraher, Thomas W. Davis, 2019 This handbook brings together work by leading scholars of the archaeology of early Christianity in the Mediterranean and surrounding regions The 34 essays to this volume ground the history culture and society of the first seven centuries of Christianity in the latest currents of archaeological method theory and research

Sailing into the Past Jenny Bennett, 2009-06-18 Until recently there was little practical knowledge of the ships of the distant past We could only surmise as to the manner in which a Viking ship sailed or how fast a Greek trireme could be rowed The building of accurate replicas over the past generation has changed all that and what has been learnt about the ships and boats of our ancestors has radically changed our perceptions of sailing and voyaging This beautifully illustrated new book charts those discoveries The worlds leading authorities look at individual replicas and discuss what they have taught us Boris Rankov and John Coates for example discuss the Greek trireme while Antonia Macarthur outlines the lessons learnt on Cooks Endeavour Each chapter deals with a particular vessel and construction sail plans and the intended role are covered before an analysis of sailing performance is discussed Windward ability seakindliness speed and ease of handling are all dealt with General chapters by Richard Woodman and Sean McGrail set the scene A fascinating work which offers the most accessible view yet as to how the ships of our seafaring forbears affected the manner in which they traded fought and explored

Between Rome and Carthage Michael P. Fronda, 2010-06-10 Hannibal invaded Italy with the hope of raising widespread rebellions among Rome s subordinate allies Yet even after crushing the Roman army at Cannae he was only partially successful Why did some communities decide to side with Carthage and others to side with Rome This is the fundamental question posed in this book and consideration is given to the particular political diplomatic military and economic factors that influenced individual communities decisions Understanding their motivations reveals much not just about the war itself but also about Rome s relations with Italy during the prior two centuries of aggressive expansion The book sheds new light on Roman imperialism in Italy the nature of Roman hegemony and the transformation of Roman Italy in the period leading up to the Social War It is informed throughout by contemporary political science theory and archaeological evidence and will be required reading for
