Approach To Archaeology:

Approach to Archaeology Stuart Piggott, 1965 Critical Approaches to Fieldwork Gavin Lucas, 2001 This text uses the development of fieldwork over the last 150 years to provide an examination of the conceptual framework within which archaeology is practised today *Theoretical Approaches in Bioarchaeology* Colleen M. Cheverko, Julia R. Prince-Buitenhuis, Mark Hubbe, 2020-08-20 *Theoretical Approaches in Bioarchaeology* emphasizes how several different theoretical perspectives can be used to reconstruct the biocultural experiences of humans in the past Over the past few decades bioarchaeology has been transformed through methodological revisions technological advances and the inclusion of external theoretical frameworks from the social and natural sciences These interdisciplinary perspectives became the backbone of bioarchaeology and strengthened the discipline's ability to address questions about past biological and social dynamics Consequently how why and when to apply external theory to studies of past populations are central and timely questions tied to future developments of the discipline This book facilitates ongoing dialogues about theoretical applications within the field and interdisciplinary connections between bioarchaeology biological anthropology and other disciplines Each chapter highlights how a theoretical framework originating from a social or natural science connects to past and future bioarchaeological research For scholars and archaeologists interested in the theoretical applications of bioarchaeology this book will be an excellent resource The Strong Case Approach in Behavioral Archaeology Michael B. Schiffer, Charles R. Riggs, J. Jefferson Reid, 2017 Although all archaeologists subscribe in principle to building strong cases in support of their inferences behavioral archaeology alone has created methodology for developing strong cases in practice The behavioral version of the strong case approach rests on two main pillars 1 nomothetic generalizing strategies consisting of research in experimental archaeology ethnoarchaeology and long term processes of behavioral change to produce principles necessary for inference and 2 the formation processes of supporting evidence when constructing inferences The chapters employ a wide range of data classes demonstrating the versatility and productivity of the approach for fashioning rigorous inferences in history historical archaeology ethnoarchaeology and prehistory By illustrating the strong case approach with convincing case studies from behavioral archaeology the editors aim to alert the archaeological community about how the process of archaeological inference can be improved **Archaeological Theory** Norman Yoffee, Andrew Sherratt, 1993-07-22 This volume assesses the real achievements of archaeology in increasing an understanding of the past Without rejecting the insights either of traditional or more recent approaches it considers the issues raised in current claims and controversies about what is appropriate theory for archaeology The first section looks at the process of theory building and at the sources of the ideas employed The following studies examine questions such as the interplay between expectation and evidence in ideas of human origins social role and material practice in the formation of the archaeological record and how the rise of states should be conceptualised further papers cover issues of ethnoarchaeology visual symbols and conflicting claims to

ownership of the past The conclusion is that archaeologists need to be equally wary of naive positivism in the guise of scientific procedure and of speculation about the unrecorded intentions of prehistoric actors

Applying Evolutionary Archaeology Michael J. O'Brien, R. Lee Lyman, 2000-03-31 Anthropology and by extension archaeology has had a long standing interest in evolution in one or several of its various guises Pick up any lengthy treatise on humankind written in the last quarter of the nineteenth century and the chances are good that the word evolution will appear somewhere in the text If for some reason the word itself is absent the odds are excellent that at least the concept of change over time will have a central role in the discussion After one of the preeminent and often vilified social scientists of the nineteenth century Herbert Spencer popularized the term in the 1850s evolution became more or less a household word usually being used synonymously with change albeit change over extended periods of time Later through the writings of Edward Burnett Tylor Lewis Henry Morgan and others the notion of evolution as it applies to stages of social and political development assumed a prominent position in anthropological discussions To those with only a passing knowledge of American anthropology it often appears that evolutionism in the early twentieth century went into a decline at the hands of Franz Boas and those of similar outlook often termed particularists However it was not evolutionism that was under attack but rather comparativism an approach that used the ethnographic present as a key to understanding how and why past peoples lived the way they did Boas 1896

A Modern Approach to Archaeology Kolton Warner, 2020-09-15 The study of human activity through the recovery and analysis of material culture falls under the domain of archaeology It aims to learn about past societies and the human race development The archaeological records comprise of artifacts biofacts cultural landscapes etc In order to gain knowledge about the past it uses the methods of surveying excavation and analysis of the data collected In archaeology the survey refers to field research done by archaeologists to collect information about the location distribution and organization of past human cultures The exposure processing and recording of archaeological remains falls under the process of excavation Analysis refers to the processes that are used to study archaeological materials once the excavation is completed This book unravels the recent studies in the field of archaeology The topics included herein are of utmost significance and bound to provide incredible insights to readers This book is a resource guide for experts as well as students

Greek Archaeology Christopher Mee, 2011-04-18 Christopher Mee presents an extensive examination of the material culture of the Greek world from its Neolithic roots in 7000 B C to the close of the Hellenistic period in 146 B C Features a unique thematic approach to the study of Greek archaeology Includes extensive use of illustrations many of which are not commonly featured Allows for the study of a particular period of time by its chronological arrangement within each chapter

Archaeology as a Process Michael John O'Brien, R. Lee Lyman, Michael B. Schiffer, 2005 The publication in 1962 of Lew Binford's paper Archaeology as Anthropology is generally considered to mark the birth of processualism a critical turning point in American archaeology In the hands of Binford and other young University of Chicago graduates of the 1960s this new archaeology became the

mainstream approach in the U S The realignment that the processualists proposed was so thorough that its effects are still being felt today Predictably processualism also spun off a number of other isms several of which grew up to challenge its supremacy Archaeology as a Process traces the intellectual history of Americanist archaeology in terms of the research groups that were at the forefront of these various approaches concentrating as much on the archaeologists as it does on method and theory thus setting it apart from other treatments published in the last fifteen years Peppered with rare photographs of well known archaeologists in some interesting settings the book documents the swirl and excitement of archaeological controversy for the past forty years with over 1 600 references and an in depth treatment of all the major intellectual approaches The contributors examine how archaeology is conducted the ins and outs of how various groups work to promote themselves and how personal ambition and animosities can function to further rather than retard the development of the discipline

Space - Archaeology's Final Frontier? An Intercontinental Approach Dustin

Keeler, Roderick B. Salisbury, 2009-03-26 This book discusses the cultural social and archaeological aspects of space and the impact of spatial concepts in practical archaeological case studies It summarizes recent developments and looks to the future exploring some of the cutting edge ideas in spatial method and theory The past decade has seen significant advances in the tools available for spatial analysis in archaeology and theory and method regarding the spatial character of archaeology must keep pace with these advances Geomorphological and geochemical techniques geographic information systems remotely sensed data virtual reality and electronic survey technology provide new opportunities but also require new ideas This book gives us insight into the ways that people have used space to subsist to recreate their culture in their homelands or in new areas or impose their culture on others Contributors address the way archaeological notions of space and deep time can add to society's understanding of landscape social relationships past environment and cultural heritage The contributions from Europe and North America demonstrate intercontinental connections and explore ways of using dynamic models of spatial patterning to assess human activity within natural and cultural landscapes
