Archaeology And Ethnohistory Of Iximche:

Archaeology and Ethnohistory of Iximché Charles Roger Nance, Stephen L. Whittington, Barbara Elizabeth Jones-Borg, 2003 This book presents the long awaited data from Guillemín's excavations at the capital of the Cakchiquel Maya. It will be an excellent resource for Maya scholars and students. Lori Wright Texas A M University. Conquered by the Spanish in 1524 Iximché was the capital of the Cakchiquel Maya in Highland Guatemala. It is known to Mesoamerican archaeologists through the work of George Guillemín who excavated the ceremonial center of Iximché from the late 1950s through the early 1970s but produced only summary articles on the site. This book reconstructs the history of Iximché based on analyses of ceramics and human skeletal remains on Guillemín's original excavation notes, drawings and photographs and on the ethnohistorical literature. It contains the first detailed ceramic analysis for a Late Postclassic Cakchiquel site and the ethnohistorical sketch is the first English language synthesis of regional Cakchiquel history. It is also the first book in 50 years to include a comprehensive analysis of Highland Maya skeletons. Contents: 1 Introduction by C. Roger Nance, Stephen L. Whittington and Barbara E. Borg; 2 Iximché and the Cakchiquels ca. 1450-1540: An Ethnohistorical Sketch by Barbara E. Borg; 3 Cakchiquel Ethnohistory: an Archaeological Perspective by C. Journey to the Republic of Guatemala; Land of the Maya
Kalman Dubov, 2023-05-10 The Central American country of Guatemala was populated by the Maya people whose empire extended from Honduras to the south to today's southern Mexico Remnants of their presence are found throughout this region with monumental architecture cities palaces and great pyramids Wherever one looks the explosion of growth and development captures the viewer in its thrall Even the many glyphs adorning these sites with their unique writing style are a marvel to behold They lived here for an estimated two thousand years and then in the early 16th century the Spanish came and conquered these people By then their greatness had already ended in the midst of the 10th century when their culture and civilization collapsed But they retained their culture by way of thousands of pictographic books which detailed their way of life and their advancements But the Spaniards zealous in their Catholicism sought out and destroyed every such book they could find and burned them all Except for three such books known as the Maya Codices Historians and scholars began the slow process of deciphering the Maya past Great effort was expended and the reality of their lives culture kings wars and daily practice began to emerge And the world was astounded by the emerging picture Perhaps a first in the world was their mathematical calculation with zero a phenomenal achievement Interestingly the glyph of the zero depicted a woman what mathematical genius was she to use zero in calculations Their astronomy of the heavenly spheres was astoundingly precise as was their knowledge of geometry and trigonometry Their religion however included human sacrifices following the practice of other nearby civilizations such as the Aztecs the Inca in South America and others The Spaniards stopped such worship and offerings and now subjugated these people into serfdom called *encomiendas* or enforced working for the conquistadors and their descendants Independence from Spain came in 1821 but the Mayan living conditions did not change The country became divided between the Spanish descendants now known as the *Criollos* the middle class known as *Ladinos* not to be confused with Jews in 9th century Castilian Spain and the Maya and other indigenous The social distance from the upper to

lower classes was immense And that distance came forward during Guatemala s Civil War from 1960 to 1996 The violence and massacres during this period was so evil the president of the country Rios Montt was charged and convicted of Genocide the first time a country charged its own leader with this crime At a previous age and time the face of Guatemala presented immense achievements Today violence crime and cultural penury is self evident Guatemala is a third world country where the majority of its people live in great poverty while the upper class has the land its abundance and vast wealth **The**

Bioarchaeology of Space and Place Gabriel D. Wrobel,2014-04-16 The Bioarchaeology of Space and Place investigates variations in social identity among the ancient Maya by focusing on individuals and small groups identified archaeologically by their inclusion in specific discrete mortuary contexts or by unusual mortuary treatments Utilizing archaeological biological and taphonomic data from these contexts the studies employ a variety of methodological approaches to reconstruct aspects of individuals life course and mortuary pathways Following this specific mortuary behaviors are discussed in relation to their local or regional cultural setting using relevant archaeological ethnohistoric and or ethnographic data in an effort to interpret their meaning within the broader social political and economic contexts in which they were carried out This volume covers a number of topics that are currently being debated in Maya archaeology including identification and discussion of the role and extent of human sacrifice in Maya culture the use of ancestors for maintaining political power the mortuary use of caves by both elites and non elites ethnic distinctions within urban areas and the extent of movement of people between communities Importantly the papers in this volume attempt to test and move beyond static dichotic categories that are often employed in mortuary studies in an effort to better understand the complex ways in which the Maya conceptualized and manipulated social identity This type of nuanced case study approach that incorporates historical archaeological and theoretical contextualization is becoming increasingly important in the field of bioarchaeology providing valuable sources of data where small diverse samples impede populational approaches **Archaeology and Ethnohistory of the Central**

Pictograph to Alphabet -- and Back Robert M. Hill II, 2012-01-01 The Xajil chronicle of the Kaqchikel Maya of Guatemala is topically the most diverse lengthy and organizationally complex of the surviving highland Maya historical texts that were first recorded alphabetically in the colonial period In this monograph the author demonstrates that much of the Chronicle was redacted from pre conquest pictographic documents documents that now are lost Both the organization and topical coverage allow the author to identify the specific genres of the pictographic originals and to characterize the content of pre conquest historical archives as well as gauge the amount of information contained in such documents which would necessarily have been committed to memory by indigenous historians Illus
