

The Conversation between the Rider's Hands and the Horse's Mouth

- *If a rider insists on overpowering and dominating his mount, he will not develop a relaxed and tranquil harmony with his horse.*
- *If a rider always strives to raise, shorten, or confine his horse's head and neck with the reins, then he misunderstands the fundamental principle that rein aids are always secondary and used to accompany other aids.*
- *Reins must not be thought of as solid and unyielding "railroad ties" that need to be manipulated by brute strength; rather, they ought to be considered thin, flexible poles with enough "give" to allow the horse's neck a certain amount of freedom.*
- *Soft rein contact invites the horse to stretch with a long neck into the bit in a relaxed manner, accept the rein aids willingly and freely, and answer these aids with peaceful chewing.*
- *The horse's head and neck must be free to act as a "balancing rod," as the horse finds and supports a shared equilibrium under the rider's weight.*
- *Successful empathetic rein contact is characterized by a continuous, soft dialogue between the rider's hands and the horse's tongue and largely foregoes exerting pressure on the lower jaw.*
