Information is Energy Lienhard Pagel, 2023-06-21 An objective dynamic and physically justified concept of information is elaborated starting from Shannon's concept of entropy and applied to information technology artificial intelligence consciousness and thermodynamics The justification of an information conservation theorem acquires practical significance in information technology especially as it moves into the quantum realm photonics quantum computing The unconditional dynamics of information and its objectivity are critically examined and are the foundations of the considerations We live in the information age but the concept of information is still not defined objectively and physically This book defines a dynamic concept of information that results in a conservation of information principle Just as the principle of conservation of energy is essential to understanding energy the principle of conservation of information leads to a deeper understanding of information Information is strongly related to entropy always in motion cannot disappear and is independent of subjects **The Art and**
