Letter-, Word- and Mind-blindness James Hinshelwood,1900 **The Lancet** ,1895 *Blind Vision* Zaira Cattaneo,Tomaso Vecchi,2023-12-05 An investigation of the effects of blindness and other types of visual deficit on cognitive abilities Can a blind person see The very idea seems paradoxical And yet if we conceive of seeing as the ability to generate internal mental representations that may contain visual details the idea of blind vision becomes a concept subject to investigation In this book Zaira Cattaneo and Tomaso Vecchi examine the effects of blindness and other types of visual deficit on the development and functioning of the human cognitive system Drawing on behavioral and neurophysiological data Cattaneo and Vecchi analyze research on mental imagery spatial cognition and compensatory mechanisms at the sensorial cognitive and cortical levels in individuals with complete or profound visual impairment They find that our brain does not need our eyes to see Cattaneo and Vecchi address critical questions of broad importance the relationship of visual perception to imagery and working memory and the extent to which mental imagery depends on normal vision the functional and neural relationships between vision and the other senses the specific aspects of the visual experience that are crucial to cognitive development or specific cognitive mechanisms and the extraordinary plasticity of the brain as illustrated by the way that in the blind the visual cortex may be reorganized to support other perceptual or cognitive functions In the absence of vision the other senses work as functional substitutes and are often improved With *Blind Vision* Cattaneo and Vecchi take on the tyranny of the visual pointing to the importance of the other senses in cognition **Federal Register** ,1964-05

Veterans' Compensation and Program Improvements Amendments of 1983 United States. Congress. Senate. Committee on Veterans' Affairs,1984 **Reading between Designs** Piers D. Britton,Simon J. Barker,2010-01-01 From the alien worlds of Star Trek to the realistic operating room of ER the design of sets and costumes contributes not only to the look and mood of television shows but even more importantly to the creation of memorable characters Yet until now this crucial aspect of television creativity has received little critical attention despite the ongoing interest in production design within the closely allied discipline of film studies In this book Piers Britton and Simon Barker offer a first analytical study of scenic and costume design for television drama series They focus on three enduringly popular series of the 1960s The Avengers The Prisoner and Doctor Who and discuss such topics as the sartorial image of Steed in The Avengers the juxtaposition of picturesque and

fascistic architecture in *The Prisoner* and the evolution of the high tech interior of *Doctor Who*'s TARDIS Interviews with the series original designers and reproductions of their original drawings complement the authors analysis which sheds new light on a variety of issues from the discourse of fashion to that of the heritage industry notions of Pop and retro and the cultural preoccupation with realism and virtual reality
