Blue Magic The People Power And Politics Behind The Ibm Personal Computer:

Blue Magic James Chposky, Ted Leonsis, 1988 Discusses the story behind the IBM PC the people responsible for the PC s development as well as IBM s power and the politics involved *Inventing the Electronic Century* Alfred Dupont CHANDLER, Takashi Hikino, Andrew Von Nordenflycht, Alfred D Chandler, 2009-06-30 Consumer electronics and computers redefined life and work in the twentieth century In *Inventing the Electronic Century* Pulitzer Prize winning business historian Alfred D Chandler Jr traces their origins and worldwide development From electronics prime mover RCA in the 1920s to Sony and Matsushita s dramatic rise in the 1970s from IBM s dominance in computer technology in the 1950s to Microsoft s stunning example of the creation of competitive advantage this masterful analysis is essential reading for every manager and student of technology **A ^ANation Transformed by Information** Alfred D. Chandler Jr., James W. Cortada, 2000-08-10 The editors and contributors in this book argue that information is the driver of a third industrial revolution They demonstrate that the information revolution actually has been taking place for two centuries and they trace the history of this revolution from Colonial times to the present day **Telecommunications Update** , How Societies Embrace Information Technology James W. Cortada, 2010-03-02 This book discusses how computers are shaping contemporary society with a tight focus on the role of corporations and governments It is aimed at government policymakers interested in economic development and at private sector managers who routinely make decisions to acquire and use information technology now a worldwide expenditure of over 2 trillion annually The book will also interest a wide range of academics concerned with the sociology history economics and the effects of IT on contemporary society and to the general trade market *Computer, Student Economy Edition* Martin Campbell-Kelly, 2018-10-03 This book covers the way computing was handled before the arrival of electronic computers It discusses manual information processing and early technologies The book describes the development of software technology the professionalization of programming and the emergence of a software industry **A History of Modern Computing, second edition** Paul E. Ceruzzi, 2003-04-08 From the first digital computer to the dot com crash a story of individuals institutions and the forces that led to a series of dramatic transformations This engaging history covers modern computing from the development of the first electronic digital computer through the dot com crash The author concentrates on five key moments of transition the transformation of the computer in the late 1940s from a specialized scientific instrument to a commercial product the emergence of small systems in the late 1960s the beginning of personal computing in the 1970s the spread of networking after 1985 and in a chapter written for this edition the period 1995 2001 The new material focuses on the Microsoft antitrust suit the rise and fall of the dot coms and the advent of open source software particularly Linux Within the chronological narrative the book traces several overlapping threads the evolution of the computer s internal design the effect of economic trends and the Cold War the long term role of IBM as a player and as a target for upstart entrepreneurs the growth of software from a hidden element

to a major character in the story of computing and the recurring issue of the place of information and computing in a democratic society The focus is on the United States though Europe and Japan enter the story at crucial points on computing per se rather than on applications such as artificial intelligence and on systems that were sold commercially and installed in quantities

Biographies of Scientists for Sci-Tech Libraries Tony Stankus, 2019-12-05 This book first published in 1991 is an invaluable guide to biographies of scientists from a wide variety of scientific fields The books selected for this highly descriptive bibliography help librarians shatter readers stereotypes of scientists as monomaniacal and uninteresting people by providing interesting and provocative titles to capture the interest of students and other readers The biographies included in this very special bibliography were carefully selected for their humour and human insights to give future scientists encouragement inspiration and an understanding of the origins of particular scientific fields These biographies are unique in that they explore the whole personality of the scientist giving students a glimpse at the variety and drama of the lives beyond well known contributions or Nobel prize accomplishments

Global Century Series One World Divisible David Reynolds, 2001-03-06 A magisterial account of our time by a distinguished historian Walter LaFeber author of *The Clash* This brilliant history vividly captures the great political events of the past 50 years while carefully avoiding an encyclopedia approach of illustrations

The Challenge of Remaining Innovative Sally H. Clarke, Naomi R. Lamoreaux, Steven W. Usselman, 2009 The contributors explore two main themes the challenge of remaining innovative and the necessity of managing institutional boundaries in doing so The book is organized into four parts which move outward from individual firms to networks or clusters of firms to consultants and other intermediaries in the private economy who operate outside of the firms themselves and finally to government institutions and politics Editor
