Blue Revolution Land Use And Integrated Water Resources Management:

Blue Revolution Ian R. Calder, 2005 First Published in 2005 Routledge is an imprint of Taylor Francis an informa company

The Blue Revolution Ian R. Calder, 1999 The Blue Revolution discusses the revolution that is underway in the development of new plans strategies and designs for land use and all water related developments Calder provides fresh information on land water interactions that dispel much of the mythology that has hindered rational land use and water resource decision making in the past This essential guide to recent breakthroughs in water resource management will prove indispensable to policymakers researchers and students of hydrology geography biology and environmental sciences

Blue Revolution Ian R. Calder, 2012-05-16 Blue Revolution upturns some environmental applecarts not for the hell of it but so we can manage our environment better Fred Pearce New Scientist This updated and revised edition of The Blue Revolution provides further evidence of the need to integrate land management decision making into the process of integrated water resources management It presents the key issues involved in finding the balance between the competing demands for land and water for food and other forms of economic production for sustaining livelihoods and for conservation amenity recreation and the requirements of the environment It also advocates the means and methodologies for addressing them A new chapter Policies Power and Perversity describes the perverse outcomes that can result from present often myth based land and water policies which do not consider these land and water interactions New research and case studies involving ILWRM concepts are presented for the Panama Canal catchments and in relation to afforestation proposals for the UK Midlands

Global Perspectives on Integrated Water Resources Management Vasudha Pangare, 2006 The basic concepts of Integrated Water Resource Management IWRM and the normative strategic and operative dimensions of the process are explained in simple unbiased terms in this guide Twelve case studies illustrate the scale and scope of river basin organization in different parts of the world from local projects such as the Gagas River Basin to larger transboundary basin work on the Mekong and the Rhine Environmental considerations institutional arrangements and implementation processes are also highlighted to increase understanding of these concepts within the context of IWRM

Rodda, Mark Robinson, 2015-07-09 Hydrology is vital to human civilisations as well as to natural ecosystems yet it has only emerged as a distinct scientific discipline during the last 50 years or so This book reviews the development of modern hydrology primarily through the experiences of the multidisciplinary team of scientists and engineers at Wallingford near Oxford who have been at the forefront of many of the developments in UK hydrological research These topics include The development of basic understanding through the collection of data with specialised instrumentation in experimental basins The study of extreme flows both floods and droughts The role moisture in the soil Studies of the processes controlling evaporation Water resource studies Modelling and prediction of the extremes of flow improved Understanding of water quality issues A widening recognition of the importance of an ecosystem approach Meeting the challenges of climate change Data handling Future developments in hydrology and the pressures which generate them Readership hydrologists in both academia and a wide range of applied fields such as civil engineering meteorology geography and physics as well as advanced students in earth science environmental science and physical geography programmes worldwide Future Bioenergy and Sustainable Land Use Renate Schubert, 2009-12-01 Because of the major opportunities and risks associated with it and the complexity of the subject bioenergy policy has in a short time become a challenging political task for regulators and planners a task that can only be accomplished through worldwide cooperation and the creation of an international framework This book s central message is that the sustainable potential of bioenergy which can be tapped all over the world should be utilized provided that threats to sustainability are avoided In particular the use of bioenergy must not endanger food security or the goals of nature conservation and climate change mitigation **The Politics of Water in Africa** Inga M. Jacobs, 2012-11-02 Water resources and related issues are of great significance in 21st century politics In Africa for example hydropolitics affect politics and policymaking at the local national and international levels To investigate water politics this unique work focuses on the issue transboundary water governance in Southern and Eastern Africa Based on extensive field research it offers a comparative study of the Orange Senqu and Nile basins in Africa arguing that both causal and behavioral factors such as localization and trust building drive the multi leveled development of cooperative management norms and foster the creation of regional communities of interest The book combines theory analysis and fieldwork within the framework of Constructivism as well as a wide range of examples to identify and analyze the nature of norms in hydropolitics By doing so it will help shape the debate on how water conflict and cooperative governance should evolve and will interest anyone studying African politics hydropolitics and issues of development **Biological Invasions in South Africa** Brian W. van Wilgen, John Measey, David M. Richardson, John R. Wilson, Tsungai A. Zengeya, 2020-03-10 This

open access volume presents a comprehensive account of all aspects of biological invasions in South Africa where research has been conducted over more than three decades and where bold initiatives have been implemented in attempts to control invasions and to reduce their ecological economic and social effects It covers a broad range of themes including history policy development and implementation the status of invasions of animals and plants in terrestrial marine and freshwater environments the development of a robust ecological theory around biological invasions the effectiveness of management interventions and scenarios for the future The South African situation stands out because of the remarkable diversity of the country and the wide range of problems encountered in its varied ecosystems which has resulted in a disproportionate investment into both research and management The South African experience holds many lessons for other parts of the world and this book should be of immense value to researchers students managers and policy makers who deal with biological invasions and ecosystem management and conservation in most other regions

Revisiting Integrated Water Resources Management Cecilia Tortajada, 2017-10-02 The book includes seventeen excellent researched and documented papers that reflect the diversity of thought ideas and experiences related to IWRM They draw from an extensive inclusive and geographically representative range of theoretical propositions and practical examples These include the implementation status of the IWRM concept at local basin regional and national levels its appropriateness for the twenty first century main implementation gaps from the institutional legal policy governance management and technical viewpoints the likelihood that IWRM s entrenchment in laws regulations and policies has led to smoother implementation and the reasons why that has been the case reflexions on whether the attention given to IWRM is pushing other alternatives to the policy periphery and the new conceptual constructions that can be put forward for discussion in the international arena For the development and water communities it is imperative to debate and reach towards more illustrative conclusions regarding whether the promotion of the IWRM concept and its actual implementation status have been beneficial for development and how the notion could evolve to achieve this end In depth objective and constructive discussions arguments proposals and ideas are put forward for analysis by all interested parties The book has the objective of fostering scholarly exchange encouraging intellectual debate and promoting the advancement of knowledge and understanding of IWRM as a concept as a goal per se and as a strategy towards development goals This book was published as a special issue of the International Journal of Water Resources Development
