Blood Race:

Blood Will Tell Katherine Ellinghaus, 2017-08 *Blood Will Tell* reveals the underlying centrality of blood that shaped official ideas about who was eligible to be defined as Indian by the General Allotment Act in the United States. Katherine Ellinghaus traces the idea of blood quantum and how the concept came to dominate Native identity and national status between 1887 and 1934 and how related exclusionary policies functioned to dispossess Native people of their land. The U.S. government's unspoken assumption at the time was that Natives of mixed descent were undeserving of tribal status and benefits notwithstanding that Native Americans of mixed descent played crucial roles in the national implementation of allotment policy. Ellinghaus explores on the ground case studies of Anishinaabeg, Arapahos, Cherokees, Eastern Cherokees, Cheyennes, Chickasaws, Choctaws, Creeks, Lakotas, Lumbees, Ojibwes, Seminoles, and Virginia tribes. Documented in these cases is the history of blood quantum as a policy, reveals assimilation's implications and legacy. The role of blood quantum is integral to understanding how Native Americans came to be one of the most disadvantaged groups in the United States and it remains a significant part of present-day debates about Indian identity and tribal membership. *Blood Will Tell* is an important and timely contribution to current political and scholarly debates.

Steeped in Blood Frances J. Latchford, 2019-08-15 What personal truths reside in biological ties that are absent in adoptive ties? And why do we think adoptive and biological ties are essentially different when it comes to understanding who we are? At a time when interest in DNA and ancestry is exploding, Frances Latchford questions the idea that knowing one's bio genealogy is integral to personal identity or a sense of family and belonging. Upending our established values and beliefs about what makes a family, *Steeped in Blood* examines the social and political devaluation of adoptive ties. It takes readers on an intellectual journey through accepted wisdom about adoption, twins, kinship, and incest and challenges our naturalistic and individualistic assumptions about identity and the biological ties that bind us, sometimes violently, to our families. Latchford exposes how our desire for bio genealogical knowledge, understood as it is by family and adoption experts, pathologizes adoptees by posing the biological tie as a necessary condition for normal identity formation. Rejecting the idea that a love of the self is fundamental to family bonds, her book is a reaction to the wounds families suffer whenever they dare to revel in their difference. A rejoinder to rhetoric that defines adoptees, adoptive kin, and their family intimacies as inferior and inauthentic, *Steeped in Blood*'s view through the lens of critical adoption studies decenters our cultural obsession with the biological family imaginary and makes real the possibility of being family in the absence of blood.

What's the Use of Race? Ian Whitmarsh, David S. Jones, 2010-04-16 How race as a category reinforced by new discoveries in genetics is used as a basis for practice and policy in law, science, and medicine. The post-civil rights era perspective of many scientists and scholars was that race was nothing more than a social construction. Recently, however, the relevance of race as a social, legal, and medical category has been reinvigorated by science, especially by discoveries in genetics. Although in 2000 the Human Genome Project reported that

humans shared 99.9 percent of their genetic code scientists soon began to argue that the degree of variation was actually greater than this and that this variation maps naturally onto conventional categories of race In the context of this rejuvenated biology of race the contributors to *What's the Use of Race* investigate whether race can be a category of analysis without reinforcing it as a basis for discrimination Can policies that aim to alleviate inequality inadvertently increase it by reifying race differences The essays focus on contemporary questions at the cutting edge of genetics and governance examining them from the perspectives of law science and medicine The book follows the use of race in three domains of governance ruling knowing and caring Contributors first examine the use of race and genetics in the courtroom law enforcement and scientific oversight then explore the ways that race becomes implicitly or explicitly part of the genomic science that attempts to address human diversity and finally investigate how race is used to understand and act on inequities in health and disease Answering these questions is essential for setting policies for biology and citizenship in the twenty first century **The**

Invention of Race in the European Middle Ages Geraldine Heng, 2018-03-08 In *The Invention of Race in the European Middle Ages* Geraldine Heng questions the common assumption that the concepts of race and racism only began in the modern era Examining Europe's encounters with Jews Muslims Africans Native Americans Mongols and the Romani Gypsies from the 12th through 15th centuries she shows how racial thinking racial law racial practices and racial phenomena existed in medieval Europe before a recognizable vocabulary of race emerged in the West Analysing sources in a variety of media including stories maps statuary illustrations architectural features history saints lives religious commentary laws political and social institutions and literature she argues that religion so much in play again today enabled the positing of fundamental differences among humans that created strategic essentialisms to mark off human groups and populations for racialized treatment Her ground breaking study also shows how race figured in the emergence of *homo europaeus* and the identity of Western Europe in this time *Hindu Nationalism* Chetan Bhatt, 2020-05-15 The rise of authoritarian Hindu mass

movements and political formations in India since the early 1980s raises fundamental questions about the resurgence of chauvinistic ethnic religious and nationalist movements in the late modern period This book examines the history and ideologies of Hindu nationalism and *Hindutva* from the end of the last century to the present and critically evaluates the social and political philosophies and writings of its main thinkers Hindu nationalism is based on the claim that it is an indigenous product of the primordial and authentic ethnic and religious traditions of India The book argues instead that these claims are based on relatively recent ideas frequently related to western influences during the colonial period These influences include eighteenth and nineteenth century European Romantic and Enlightenment rationalist ideas preoccupied with archaic primordialism evolution organicism vitalism and race As well as considering the ideological impact of National Socialism and Fascism on Hindu nationalism in the 1930s the book also looks at how Aryanism continues to be promoted in unexpected forms in contemporary India Using a wide range of historical and contemporary sources the author considers the

consequences of Hindu nationalist resurgence in the light of contemporary debates about minorities secular citizenship ethics and modernity **Beyond Blood** S. other but also how the war brought them together She details an intricate timeline first describing how Königsberg a seven hundred year old German port city on the Baltic Sea and lifelong home of Immanuel Kant became infamous in the 1930s as the easternmost bastion of Hitler's Third Reich and the launching point for the Nazis genocidal war in the East She then describes how after being destroyed by bombing and siege warfare in 1945 Königsberg became Kaliningrad the westernmost city of Stalin's Soviet Union Königsberg Kaliningrad is the only city to have been ruled by both Hitler and Stalin as their own in both wartime occupation and as integral territory of the two regimes German Blood Slavic Soil presents an intimate look into the Nazi Soviet encounter during World War II Eaton impressively shows how this outpost city far from the centers of power in Moscow and Berlin became a closed off space where Nazis and Stalinists each staged radical experiments in societal transformation and were forced to reimagine their utopias in dialogue with the encounter between the victims and proponents of the two regimes
