The History of Colonization from the Earliest Times to the Present Day Henry Crittenden Morris, 1908 Africa's Past, Our Future Kathleen R. Smythe, 2015-07-06 An impressive synthesis of current literature in African history making it understandable and relevant Jan Bender Shetler author of *Imagining Serengeti A History of Landscape Memory in Tanzania from Earliest Times to the Present* Africa s Past Our Future engages the history of the African continent through the perspective of global issues such as political instability economic development and climate change Since the past may offer alternative models for thinking about our collective future this book promotes an appreciation for African social economic and political systems that have endured over the long term and that offer different ways of thinking about a sustainable future Introducing readers to the wide variety of sources from which African history is constructed the book s ten chapters cover human evolution the domestication of plants and animals climate change social organization the slave trade and colonization development and contemporary economics and politics Smythe not only provides an excellent survey of the latest research on Africa s past she also presents a concise and clear argument as to why this history is relevant today African Studies Review Recommended Choice Grapples with the narratives and facts and where they fit in global perspective but why this is all salient and critically meaningful to our lives today in terms of lessons we can learn and ideas we can borrow This is a unique approach not yet available on the market Catherine Cymone Fourshey Susquehanna University African Seaports and Maritime Economics in Historical Perspective Ayodeji Olukoju, Daniel Castillo Hidalgo, 2020-07-14 This book updates African maritime economic history to analyse the influence of seaports and seaborne trade processes of urbanization and development and the impact of globalization on port evolution within the different regions of Africa It succeeds the seminal collection edited by Hoyle Hilling which was conceived during a phase of sustained economic growth on the African continent and builds on a similar trend where African economies have experienced processes of economic growth and the relative improvement of welfare conditions It provides valuable insights on port evolution and the way the maritime sector has impacted the hinterland and the regional economic structures of the affected countries including the several and varied agents involved in these activities African Seaports and Maritime Economics in Historical Perspective will be useful for economists historians and geographers interested in African

and maritime issues as well as policy makers interested in path dependence and long term analysis
