African Images Peter Rigby, 2020-05-12 This controversial book is an impassioned African response to the racial stereotyping of African people and people of African descent by prominent white scholars. It highlights how the media contributes to the growth of racist ideas particularly in reporting current events in Africa and demonstrates how some of America's most revered intellectuals cloak racist ideologies in ostensibly egalitarian discourses. The author seeks to rewrite the image of race in order to show the damage racism can cause serious scholarship. *The SAGE Encyclopedia of African Cultural Heritage in North America* Mwalimu J. Shujaa, Kenya J. Shujaa, 2015-07-13 The Encyclopedia of African Cultural Heritage in North America provides an accessible ready reference on the retention and continuity of African culture within the United States. Our conceptual framework holds first that culture is a form of self knowledge and knowledge about self in the world as transmitted from one person to another. Second that African people continuously create their own cultural history as they move through time and space. Third that African descended people living outside of Africa are also contributors to and participants in the creation of African cultural history. Entries focus on illuminating Africanisms cultural retentions traceable to an African origin and cultural continuities ongoing practices and processes through which African culture continues to be created and formed. Thus the focus is more culturally specific and less concerned with the broader transatlantic demographic political and geographic issues that are the focus of similar recent reference works. We also focus less on biographies of individuals and political and economic ties and more on processes and manifestations of African cultural heritage and continuity. FEATURES A two volume A to Z work available in a choice of print or electronic formats 350 signed entries each concluding with Cross references and Further Readings 150 figures and photos Front matter consisting of an Introduction and a Reader's Guide organizing entries thematically to more easily guide users to related entries Signed articles concluding with cross references **Africa and the United States, Images and Realities**, 1962 Foundational African Writers Bhekizizwe Peterson, Khwezi Mkhize, Makhosazana Xaba, 2022 The essays in this collection were crafted in celebration of the centenaries in 2019 of Peter Abrahams, Noni Jabavu, Sibusiso Cyril Lincoln, Nyembezi and Es'kia Mphahlele all of whom were born in 1919. All four centenarians lived rich and diverse lives across several continents. In the years following the Second World War they produced more than half a century of foundational creative writing and literary criticism and made stellar contributions to institutions and repertoires of African and black arts and letters in South Africa and internationally. The range of the centenarians' imaginations, critical analyses and social interventions spanned disciplinary divides. This volume in the same spirit draws on approaches that are equally transdisciplinary. Two aims thread through the contributors' reflections on the complexities of black existence and of intellectual and cultural life in the twentieth century. The first is the exploration of some of the centenarians' key texts and cultural projects that shaped their legacies. In doing so the volume contributors trace a number of divergent intellectual and aesthetic lineages in their works and organisational

activities The second aim is a consideration of the ways in which these foundational writers legacies continue to resonate today confirming their status as crucial contributors to modern African and diasporic black arts and letters

The African Photographic Archive Christopher Morton, Darren Newbury, 2020-10-15 African photography has emerged as a significant focus of research and scholarship over the last twenty years the result of a growing interest in postcolonial societies and cultures and a turn towards visual evidence across the humanities and social sciences At the same time many rich and fascinating photographic collections have come to light This volume explores the complex theoretical and practical issues involved in the study of African photographic archives based on case studies drawn from across the continent dating from the 19th century to the present day Chapters consider what constitutes an archive from the familiar mission and state archives to more local vernacular and personal accumulations of photographs the importance of a critical and reflexive engagement with photographic collections and the question of where and what is Africa as constructed in the photographic archive Essential reading for all researchers working with photographic archives this book consolidates current thinking on the topic and sets the agenda for future research in this field
