African Traditional Oral Literature and Visual cultures as Pedagogical Tools in Diverse Classroom Contexts Lewis Asimeng-Boahene, Michael Baffoe, 2018-06-01 This book the second in the series is a distinct exploration of how educational policy makers curriculum developers educators learners and social activists can utilize the hitherto untapped rich resource of African traditional oral literature and visual cultures These are epistemological reservoirs and invaluable pedagogical tools in the delivery of content in the classrooms of the present global village most of whom contain diverse student populations from varying backgrounds The content of the book is thus designed to help expand educators repertoire of understanding beyond the hitherto conventional wisdom most of which are either outdated or are colonial impositions on former colonial entities Our motivation for pulling together this anthology was due to the fact scholars educators and educational policy makers have hitherto paid little attention to the epistemological and pedagogical value of Traditional Indigenous Knowledge systems TIKS Our objective has been largely achieved by this anthology in the sense that the research perspectives of the contributors to this effort have enhanced the hitherto limited exposure and knowledge about traditional oral literature and visual cultures in Africa The torch that has been lighted from this endeavor heightens the epistemological and pedagogical implications of TIKS In launching this book we are extending a clarion call to researchers and disciples of Indigenous Knowledge systems in Africa and elsewhere to seize this opportunity and interest generated by this endeavor to undertake more studies in this area Our current efforts were focused mainly on Africa TIKS systems but we strongly believe that there are similar and equally powerful and important TIKS systems in other parts of the world Asia the Far East Central and Southern America as well as the Caribbean that are longing for exploration and exposition It is therefore our fervent hope that exploration and dissemination of knowledge in this field will continue with the flame lighted from this endeavor We believe that these efforts will greatly enhance awareness an otherwise neglected and almost forgotten but important aspects of knowledge creation and dissemination especially about traditional and hitherto unwritten histories and knowledge systems around the world These undertakings will help to broaden the conceptualization of what constitutes global knowledge within the current reality of globalization

African Musical Aesthetics John Murungi, 2011-05-25 In the West philosophy is generally confined to the domain of the intellect and music to the domain of the emotion This book makes either domain the location for the other African musical aesthetics constitutes this location and has its home in it Moreover since the separation of the domain of the intellect and the domain of emotion represents a bifurcation of what it is to be a human being and by making either domain the location of the other what African musical aesthetics accomplishes is the affirmation of a unified sense of what it is to be a human being Accordingly the unity of philosophy and music give rises to a unified sense of being

human It is to such unity that African musical aesthetics takes us For African musical aesthetics to accomplish this task this book challenges the conventional Western understanding of philosophy an understanding that projects Africa as devoid of philosophy It is this projection that pervaded Africa during the colonial period and it is the projection that is challenged in African philosophy From an African philosophical perspective African musical aesthetics turns out to be an emancipatory process that seeks to affirm the humanity of Africans but also a process that seeks to affirm common humanity Music is not solely a matter of audiology what is played or what one dances to It has its elemental task in calling our attention to what we are as human beings In so far as it is sensuous it constitutes us as members of the sensible world and links us intrinsically to all that is sensuous It is more than humanism Music registers us as members of nature It is nature naturing
