After Contact The Human Response To Extraterrestrial Life:

The Humaniverse Guide to First Contact with ET Keith Seland, 2020-10-19 If extraterrestrial intelligence ETI exists elsewhere in our universe any meaningful and absolute confirmation would require either a transformative announcement global broadcast single fantastic irrefutable event experience or acknowledgment of a large accumulation of increasing evidence which equates to that historical revelation *The Humaniverse Guide to First Contact with ET* embarks on an exploration of how ETI is viewed by theologians and their antagonists as well as by advocates and refuters alike This work is a detailed investigation of how religious philosophy aligns with other worldviews and its potential reliability toward application and assistance in the development of a future relationship with ETI The lens is focused on humankind s evolution of cognition conjecture logic and knowledge about ETI as transformative toward these end points As we know the only way these end points can be resolved are through the eyes experiences and activities as undertaken by the only intelligent life form of which we are aware namely ourselves Do you think your worldview about the meaning and purpose of life will be changed if and when ET comes calling

After Contact Albert A. Harrison, 1997-08-21 Examines in detail the psychological sociological political and cultural dimensions of the search for extraterrestrial intelligence

Contact with Extraterrestrial Intelligence and Human Law Michael Bohlander, 2023-08-07 It is statistically unlikely that humans are the only intelligent species in the universe Nothing about the others will be known until contact is made beyond a radio signal from space that merely tells us they existed when it was sent That contact may occur tomorrow in a hundred years or never If it does it will be a high risk scenario for humanity It may be peaceful or hostile Relying on alien altruism and benign intentions is wishful thinking We need to begin identifying as a planetary species and develop a global consensus on how to respond in either scenario
