

Disciplinarity

- Cultural studies being a separate discipline within the academic institutions has its own challenges.
- The field does not conform to specific guidelines that make up many academic disciplines but rather requires its own criteria.
- "Disciplinarity (or being a discipline) restricts the variety of topics, interests, contexts and methods that the field can accommodate."
- "Academic disciplines in the humanities and social sciences have never been unitary formations: they integrate various methods, objects of inquiry and professional interests."
- "Increasingly disciplines flourish elsewhere than the university department or program itself- and especially in journals and conferences. That's where academics and graduate students interact away from the classroom or departmental common spaces, and that's where cultural studies forms itself as a discipline."

After The Disciplines Disciplinarity Culture And The Emerging Economy Of Studies:

Disciplinarity and Dissent in Cultural Studies Cary Nelson, Dilip Gaonkar, 2013-10-28 First published in 1996 As recently as the early 1990s people wondered what was the future of cultural studies in the United States and what effects its increasing internationalization might have What type of projects would cultural studies inspire people to undertake Would established disciplines welcome its presence and adapt their practices accordingly Disciplinarity and Dissent in Cultural Studies answers such questions It is now clear that while striking and innovative work is underway in many different fields most disciplinary organizations and structures have been very resistant to cultural studies Meanwhile cultural studies has been subjected to repeated attacks by conservative journalists and commentators in the public sphere Cultural studies scholars have responded not only by mounting focused critiques of the politics of knowledge but also by embracing ambitious projects of social political and cultural commentary by transgressing all the official boundaries of knowledge in a broad quest for cultural understanding This book tracks these debates and maps future strategies for cultural studies in academia and public life The contributors to Disciplinarity and Dissent in Cultural Studies include established scholars and new voices In a series of polemic and exploratory essays written especially for this book they track the struggle with cultural studies in disciplines like anthropology literature and history and between cultural studies and very different domains like Native American culture and the culture of science Contributors include Arjun Appadurai Michael Denning Lawrence Grossberg Cary Nelson Constance Penley Andrew Ross and Lynn Spigel

Participating in the Knowledge Society R. Finnegan, 2005-09-27 In current debates about the knowledge society and the organization of research the spotlight is most often on the universities This interdisciplinary and transhistorical volume focuses on the less often recognized work of independent researchers creating and participating in knowledge outside the academy from seventeenth century north country astronomers to Victorian naturalists to today's think tanks community historians and new forms of researching and publishing through the internet These intriguing cases raise challenging issues about the location definition and validation of research about active participation in knowledge generation and about the perhaps changing boundaries of university today

After the Disciplines Michael Peters, 1999-08-30 Since the late 1960s both internationally and locally we have witnessed the growth of subject areas outside the traditional liberal arts curriculum and disciplinary structure of the university curriculum Black Studies or Indigenous Studies Feminist or Women's Studies Critical Legal Studies Film Media Studies Gay Studies and Cultural Studies are some of the most popular The principles underlying a global neo liberalism and managerialism were responsible for restructuring universities during the 1980s Some thought that such developments imperiled the humanities while others believed that the context of globalization and the development of new communications technologies offered new hope for both interdisciplinary work and the emergence of a critical approach The book asks the following broad questions What are the underlying historical epistemological and political reasons for the emergence of

cultural studies What do these developments imply for the traditional liberal arts curriculum and the traditional discipline based university To what extent does the emergence of cultural studies displace or dislocate traditional disciplines What forms of resistance has cultural studies encountered and why To what extent does the emergence of cultural studies reflect a changing mission of the university and changing relations between the university and the wider society What is the future of cultural studies

Critical Theories, Radical Pedagogies, and Global Conflicts Gustavo Fischman, 2005 We are living in a time of resurgent global conflicts and imperialistic tensions a time in which many children are being left behind by school systems that appear more concerned with developing accountability schemes and standardized models of testing than with defending the right of every child to have access to a good education The efforts of countless teachers activists and families working and living in poor areas around the world are labeled as failures entirely discredited on the basis of their expendability in relation to capital gains or simply ignored In response to these oppressive and challenging conditions this book's contributors a group of committed educators and activists working in an ethos of solidarity across geopolitical and geographical borders have advanced arguments and strategies that link educational transformation to the larger struggle to transform oppressive social relations In a clear attempt to move beyond both nostalgia and romanticism Critical Theories Radical Pedagogies and Global Conflicts draws from a range of viewpoints conceptual and thematic transnational and crosscultural First World and Third World to articulate new directions for teachers and activists working to demonstrate that another education and indeed another world is possible

Bringing it

All Back Home Lawrence Grossberg, 1997 As one of the founding figures of cultural studies Lawrence Grossberg was an

early participant in the Birmingham Centre for Contemporary Cultural Studies project one which sought to develop a critical practice adequate to the complexities of contemporary culture The essays in *Bringing It All Back Home* bring a sense of history depth and contestation to the current success of cultural studies while charting Grossberg's intellectual and theoretical developments from his time at Birmingham to the present day Written over a twenty year period these essays which helped introduce British cultural studies to the United States reflect Grossberg's ongoing effort to find a way of theorizing politics and politicizing theory The essays collected here recognize both the specificity of cultural studies by locating it in a range of alternative critical perspectives and practices and its breadth by mapping the extent of its diversity By discussing American scholars initial reception of cultural studies its relation to communication studies and its origins in leftist politics Grossberg grounds the development of cultural studies in the United States in specific historical and theoretical context His criticism of easy identification of cultural studies with the theories models and issues of communications and his challenge to some of cultural studies current directions and preoccupations indicates what may lie ahead for this dynamic field of study Bringing together the Gramscian tradition of British cultural studies with the antimodernist philosophical positions of Foucault Deleuze and Guattari Grossberg articulates an original and important vision of the role of the political intellectual in the contemporary world and offers an essential overview of the emerging field of cultural studies by one of its leading practitioners and theorists
