After Christianity Christian Survivals In Postchristian Culture:

After Christianity Rudolph Binion, 1986 Theology in Global Context Amos Yong, Peter G. Heltzel, 2016-10-06 Robert Cummings Neville has been a consistent advocate for the necessity of global theology. Early in his career he realized that the philosophical framework of the West alone was inadequate for a truly global theology. Since then he has sought to develop theology creatively and responsibly within the world context. The original essays in this volume, written in his honour by fellow theologians, participate in and model the kind of dialogical global theology embodied in Neville's work.

A Cultural History of Causality Stephen Kern, 2009-01-10 This pioneering work is the first to trace how our understanding of the causes of human behavior has changed radically over the course of European and American cultural history since 1830. Focusing on the act of murder as documented vividly by more than a hundred novels including *Crime and Punishment*, *An American Tragedy*, *The Trial*, and *Lolita*, Stephen Kern devotes each chapter of *A Cultural History of Causality* to examining a specific causal factor or motive for murder: ancestry, childhood, language, sexuality, emotion, mind, society, and ideology. In addition to drawing on particular novels, each chapter considers the sciences: genetics, endocrinology, physiology, neuroscience, and systems of thought: psychoanalysis, linguistics, sociology, forensic psychiatry, and existential philosophy, most germane to each causal factor or motive. Kern identifies five shifts in thinking about causality: shifts toward increasing specificity, multiplicity, complexity, probability, and uncertainty. He argues that the more researchers learned about the causes of human behavior, the more they realized how much more there was to know and how little they knew about what they thought they knew. The book closes by considering the revolutionary impact of quantum theory, which, though it influenced novelists only marginally, shattered the model of causal understanding that had dominated Western thought since the seventeenth century. Others have addressed changing ideas about causality in specific areas, but no one has tackled a broad cultural history of this concept as does Stephen Kern in this engagingly written and lucidly argued book.

Modernism After the Death of God Stephen Kern, 2017-11-22 *Modernism After the Death of God* explores the work of seven influential modernists: Friedrich Nietzsche, James Joyce, D. H. Lawrence, André Gide, and Martin Heidegger. Criticized the destructive impact that they believed Christian sexual morality had had or threatened to have on their love life. Although not a Christian, Freud criticized the negative effect that Christian sexual morality had on his clinical subjects and on Western civilization, while Virginia Woolf condemned how her society was sanctioned by a patriarchal Christian authority. All seven worked to replace the loss or absence of Christian unity with non-Christian unifying projects in their respective fields of philosophy, psychiatry, or literature. The basic structure of their main contributions to modernist culture was a dynamic interaction of radical fragmentation necessitating radical unification that was always in process and never complete.

The Modernist Novel Stephen Kern, 2011-06-23 Leading scholar Stephen Kern offers a probing analysis of the modernist novel encompassing American, British, and European works. Organized thematically, the book offers a comprehensive analysis of the stunningly original

formal innovations in novels by Conrad Joyce Woolf Proust Gide Faulkner Dos Passos Kafka Musil and others Kern contextualizes and explains how formal innovations captured the dynamic history of the period reconstructed as ten master narratives He also draws briefly on poetry and painting of the first half of the twentieth century The Modernist Novel is set to become a fundamental source for discussions of the genre and a useful introduction to the subject for students and scholars of modernism and twentieth century literature

The Philosophy of Spirituality Heather Salazar, Roderick Nicholls, 2018-11-05 The essays in The Philosophy of Spirituality explore a new field in philosophy Until recently most philosophers in the analytic and continental Western traditions treated spirituality as a religious concept Any non religious spirituality tended to be neglected or dismissed as irremediably vague Here from various philosophical and cultural perspectives it is addressed as a subject of independent interest This is a philosophical response to increasing numbers of spiritual but not religious people inhabiting secular societies and the heightened interaction between a multitude of spiritual traditions in a globalized age A provocative array of approaches African Indigenous Indian Stoic and Sufic perspectives as well as Western analytic and continental views offer fresh insights many articulated by emerging voices Contributors are Mariapaola Bergomi Moses Biney Christopher Braddock Drew Chastain Kerem Eksen Nikolay Milkov Roderick Nicholls Jerry Piven Heather Salazar Eric Steinhart Richard
