Against Torture:

The United Nations Convention Against Torture and Its Optional Protocol Manfred Nowak, Moritz Birk, Giuliana Monina, 2019 This second edition of The United Nations Convention Against Torture A Commentary provides an updated analysis of all substantive organizational and procedural provisions of the Convention and its Optional Protocol ensuring that the volume continues to serve as a comprehensive guide for researchers and practitioners alike Scandinavian Penal History, Culture and Prison Practice Peter Scharff Smith, Thomas Ugelvik, 2017-07-28 This book draws on historical and cross disciplinary studies to critically examine penal practices in Scandinavia The Nordic countries are often hailed by international observers as model societies with egalitarian welfare policies low rates of poverty humane social policies and human rights oriented internal agendas This book however paints a much more nuanced picture of the welfare policies ideologies and social control in strong centralistic states Based on extensive new empirical data leading Nordic and international scholars discuss the relationship between prison conditions in Scandinavia and Scandinavian social policy more generally and argue that it is not always liberating and constructive to be embraced by a powerful welfare state This book is essential reading for researchers of state punishment in Scandinavia and it is highly relevant for anyone interested in the Nordic Model of social policy

Universal Rights, Systemic Violations, and Cultural Relativism in Morocco O. Glacier, 2013-11-06 Are universal rights bound to colonialism Are they culturally imperialistic By juxtaposing Morocco s practice of torture with its discourse of cultural relativism this study links popular resistance to universal rights to a deliberate politics that delegitimizes those very same rights requiring a new more inclusive system of universalism

Research Handbook on the Politics of Human Rights Law Bård A. Andreassen, 2023-01-20 International human rights law is undoubtedly intertwined with politics and so this Research Handbook explores and provokes reflection on how politics impacts human rights legislation and conversely how human rights law shapes politics and the functioning of the state Bringing together leading international scholars in human rights law and politics the Research Handbook provides theoretical reflections and empirical analyses across the areas of governance and policies and examines the implementation mechanisms of human rights law in national and international jurisdictions *Convention Against Torture and Other Cruel, Inhuman Or Degrading Treatment Or Punishment [various Documents]*. United Nations. Committee against Torture, 1990

International Law Malcolm N. Shaw, 2017-09-14 International Law is the definitive and authoritative text on the subject offering Shaw s unbeatable combination of clarity of expression and academic rigour and ensuring both understanding and critical analysis in an engaging and authoritative style Encompassing the leading principles practice and cases and retaining and developing the detailed references which encourage and assist the reader in further study this new edition motivates and challenges students and professionals while remaining accessible and engaging Fully updated to reflect recent case law and treaty developments this edition contains an expanded treatment of the relationship between international and domestic law

the principles of international humanitarian law and international criminal law alongside additional material on international economic law **Transnational Lawmaking Coalitions for Human Rights** Nina Reiners,2021-12-02 Explores how expert bodies and non state empowered professionals come together to shape human rights law Effective Strategies for Protecting Human Rights David Barnhizer,2017-11-01 This title was first published in 2001 This book brings together the experiences of a diverse range of leading human rights advocates and activists to demonstrate strategies for protecting human rights The volume identifies strategic problems and approaches and offers a range of strategies that hold promise for sanctioning human rights offenders and for inhibiting the behaviour of those who might otherwise engage in such activities The contributors include inter alia Noam Chomsky Justice Richard Goldstone of the Constitutional Court of South Africa who served as Chief Prosecutor of the UN War Crimes Tribunals for the former Yugoslavia and Rwanda and David Rawson United States Ambassador to Rwanda during the tragic genocide Those who work in the disparate field of human rights increasingly understand the need to see the system strategically rather than piecemeal This volume captures their insights and looks at both private and public actors including the uses and limitations of international fora to prosecute violations The focus is expanded to include private actions because political issues too often interfere with enforcement of human rights laws allowing violators to hide behind the unwillingness of national governments to take action Caribbean Anti-Trafficking Law and Practice Jason Haynes,2019-07-11 This monograph investigates the International European and Commonwealth Caribbean approaches to human trafficking from an Analytical Eclectic perspective It presents a compelling empirically based argument that although there is currently a panoply of measures aimed at preventing human trafficking prosecuting offenders and protecting trafficked victims in both Europe and the Commonwealth Caribbean these measures have in practice been fraught with a number of challenges whether of a normative institutional or individual nature The continued existence of these challenges strongly suggests that there exists a disconnect between anti trafficking law and practice which is not peculiar to small island developing States since they also extend to developed States including the United Kingdom Although these challenges are not insurmountable this monograph advances the argument that sustained social economic political and legal commitments are both necessary and desirable and that without such commitments only pyrrhic victories would be won in the fight to eradicate the scourge of the twenty first century Given the importance of the issue of human trafficking and its inescapable impact on victims families communities nations regions and the international community as a whole this monograph will serve as an important resource for policy makers scholars students and practitioners actively working in this increasingly dynamic area of law **Human Rights and America's War on Terror** Satvinder S. Juss,2018-10-25 This volume examines the success of the 9 11 attacks in undermining the cherished principles of Western democracy free speech and tolerance which were central to US values It is argued that this has led to the USA fighting disastrous wars in Afghanistan and Iraq and to sanctioning the use of torture and imprisonment without trial in Guantamo

Bay extraordinary rendition surveillance and drone attacks At home it has resulted in restrictions of civil liberties and the growth of an ill affordable military and security apparatus In this collection the authors note the irony that the shocking destruction of the World Trade Center on 9 11 should become the justification for the relentless expansion of security agencies Yet this is a salutary illustration of how the security agencies in the USA have adopted faulty preconceptions which have become too embedded within the institution to be abandoned without loss of credibility and prestige The book presents a timely assessment of both the human rights costs of the war on terror and the methods used to wage and relentlessly continue that war It will be of interest to researchers academics practitioners and students in the fields of human rights law criminal justice criminology politics and international studies
