Age Of Rights:

The Age of Rights Louis Henkin, 1990 This text explores the principal issues and developments both in international human rights and in rights in the United States and then compares the concepts and conditions of rights in various parts of the world It pays particular attention to the role of US foreign policy **Rightlessness in an Age of Rights** Ayten Gündoğdu, 2015 Rightlessness in an Age of Rights offers a critical inquiry of human rights by rethinking the key concepts and arguments of twentieth century political theorist Hannah Arendt At the heart of this critical inquiry are the challenging questions posed by the contemporary struggles of asylum seekers refugees and undocumented immigrants Age Discrimination And Children's Rights Claire Breen, 2006 One of the aims of the United Nations Convention on the Rights of the Child is to accord due recognition to the fact that the child by reason of his physical and mental immaturity needs special safeguards and care including appropriate legal protection before as well as after birth However a question mark hangs over the extent to which special safeguards and care can negatively impact on the rights of the child and result in discrimination against the child in the guise of his physical and mental immaturity This volume explores the extent to which children's rights are secured at the national level and the reasons why children's rights have or have not been recognised and secured by various states at the level of domestic law It also explores the difficulties inherent in the accordance of rights to children in order to ascertain whether they do in fact derive from the particular nature of children or whether they mask a reluctance of states to fulfil their domestic and international rights obligations to children and whether such reluctance constitutes discrimination against children The volume thus explores the theoretical and legal underpinnings of gender and race discrimination at both the domestic and international level and examines the extent to which these may be applied to the area of children's rights Children's Rights and the Minimum Age of Criminal Responsibility Don Cipriani, 2016-05-23 Children of almost any age can break the law but at what age should children first face the possibility of criminal responsibility for their alleged crimes This work is the first global analysis of national minimum ages of criminal responsibility MACRs the international legal obligations that surround them and the principal considerations for establishing and implementing respective age limits Taking an international children's rights approach with a rich theoretical framework and the vitality of the UN Convention on the Rights of the Child this work maintains a critical perspective such as in challenging the assumptions of many children's rights scholars and advocates Compiling the age limits and statutory sources for all countries this book explains the broad historical origins behind most of them identifying the recurring practical challenges that affect every country and providing the first comprehensive evidence that a general principle of international law requires all nations regardless of their treaty ratifications to establish respective minimum age limits **Young People's Human Rights and the Politics of Voting Age** Sonja C. Grover, 2010-10-05 Young People's Human Rights and The Politics of Voting Age explores the broader societal implications of voting age eligibility requirements and the legislative

bar against youth voting in North America and in Commonwealth countries where youth is defined as persons 16 and over but under age 18 The issue is raised as to whether the denial of the youth vote undermines democratic principles and values and ultimately the human dignity of youth This is the first book to address the topic of the youth vote in depth as a fundamental human rights concern relating to the entitlement in a democracy to societal participation and inclusion in influencing policy and law which profoundly affects one's life Also examined are international perspectives on the issue of voting age eligibility The book would be extremely valuable for instructional purposes as one of the primary texts in undergraduate or graduate courses on children's human rights political psychology political science sociology of law or society and as a supplementary text for courses on human rights or constitutional law and would be of interest also to members of the general public concerned with children's human rights issues Human Rights in an Information Age Gregory J. Walters, 2001-01-01 CONTENTS *Constructing Human Rights in the Age of Globalization* Mahmood Monshipouri, 2003 This work looks at political and cultural struggles to control the human rights regime with respect to property the state the environment and women It examines the dynamics and counterdynamics of transnational networks in their interactions with local actors in Iran China and Hong Kong Amnesty in the Age of Human Rights Accountability Francesca Lessa, Leigh A. Payne, 2012-05-28 This edited volume brings together well established and emerging scholars of transitional justice to discuss the persistence of amnesty in the age of human rights accountability The volume attempts to reframe debates moving beyond the limited approaches of truth versus justice or stability versus accountability in which many of these issues have been cast in the existing scholarship The theoretical and empirical contributions in this book offer new ways of understanding and tackling the enduring persistence of amnesty in the age of accountability In addition to cross national studies the volume encompasses eleven country cases of amnesty for past human rights violations Argentina Brazil Cambodia El Salvador Guatemala Indonesia Rwanda South Africa Spain Uganda and Uruguay The volume goes beyond merely describing these case studies but also considers what we learn from them in terms of overcoming impunity and promoting accountability to contribute to improvements in human rights and democracy **Intellectual property rights in an age of electronics and information.** , *The United Nations Security Council in the Age of Human Rights* Jared Genser, Bruno Stagno Ugarte, 2014-06-05 This is the first comprehensive look at the human rights dimensions of the work of the only body within the United Nations system capable of compelling action by its member states Known popularly for its failure to prevent mass atrocities in Rwanda the former Yugoslavia and Syria the breadth and depth of the Security Council's work on human rights in recent decades is much broader This book examines questions including how is the Security Council dealing with human rights concerns What does it see as the place of human rights in conflict prevention peacemaking and peacekeeping And how does it address the quest for justice in the face of gross violations of human rights Written by leading practitioners scholars and experts this book provides a broad perspective that describes explains and evaluates the

contribution of the Security Council to the promotion of human rights and how it might more effectively achieve its goals
