PLATE: Product Lifetimes And The Environment Conny A. Bakker, 2017-11-15 Product lifetimes are critical for the circular economy resource efficiency waste reduction and low carbon strategies for sustainability and are therefore of interest to academics from many different disciplines as well as original equipment manufacturers OEMs and other stakeholders The challenges related to product lifetimes must be tackled from

multiple perspectives making the sharing of knowledge and expertise from different disciplines particularly important This book presents papers from the second Product Lifetime and the Environment PLATE conference held in Delft the Netherlands in November 2017 The conference originated from the desire to bring together academic researchers working in the field of sustainability to benefit from each other s knowledge and further advance the field The book includes the 88 full papers delivered at the conference grouped according to the following 7 conference themes design for product longevity product lifetime optimization cultural perspectives on the throwaway society circular economy and product lifetimes business opportunities economic implications and marketing strategies consumer influences on product lifetimes and policy regulation and legislation The book will be of interest to all those concerned with sustainable consumption circular economy and resource efficiency

Life Cycle Networks Frank-Louthar Krause,G. Seliger,2012-12-06 The globalisation of markets and the expansion of product responsibility into the entire product life cycle lead to an increasing competitive situation for nationally and internationally operating companies Therefore to win this competition the use of the most effective and efficient resources regarding the whole product life cycle is necessary Since these resources are globally distributed the different tasks both within a phase of product life cycle and those spread over different phases are distributed as well The global interference of these tasks requires a close multilateral co operation of the companies concerned Current information and communication technologies and modern management concepts offer high potentials to meet these requirements The international seminar of CIRP on Life Cycle Engineering titled Life Cycle Networks was a forum for the presentation and discussion of current research work and recent advancements on these strategic issues for current and future engineering Complex requirements and innovative solutions to support and realise Life Cycle Networks has been revealed and summarised The employment of information technology to support both specific phases of product life cycle and holistic approaches will be the main focus This volume contains the papers presented at the seminar which provide opportunities to identify the state of the art and address future needs The parts in this volume correspond to the sessions of the seminar and are presented under the following headings Life Cycle Management Life Cycle Design Design for Environment Design for Recycling Life Cycle Assessment Disassembly IT Networks
