Ecological Footprints of Climate Change Uday Chatterjee, Angela Oyilieze Akanwa, Suresh Kumar, Sudhir Kumar Singh, Abira Dutta Roy, 2023-01-01 This book explores global implications of human activities that trigger changes in climate and the appropriate scientific adaptive and sustainable approaches as a proven information tool. It reveals that the ecological, social, and economic dynamics of the changing earth encompass huge uncertainties coupled with its ability to be linked to other forms of global change. From a scientific perspective, multiple efforts are expedient to integrate the many aspects of global changes. Increases in science and technology have afforded nations the ability to plan for the future by investing in adaptive and mitigative measures to monitor present and future changes. Just as the climatic and ecological impacts of climate change are unequally distributed, so is the adaptive capacity to cope with these impacts in different nations. Considering that wealth, infrastructure, and political stability all contribute to a nation's capacity to anticipate and respond to change, so global South nations who are disadvantaged in these areas are faced with more inequalities and more unique adaptive strategies. There is need for increased aggregate efforts and interaction between scientists, stakeholders, and policy makers to improve both decision making and global change in science. Scientists and researchers need to work on expanding the range of policies that are proposed, debated, and implemented. This way, novelty, new ideas, and methodologies are infused into the society. At this point of multiple climate footprints, there is an immense need to explore all ideas evaluating their possibilities in presenting alternative futures, developing alternative policies, and adaptive options to solve the intractable ecological footprints of climate change.

The Carbon Footprint of Everything Mike Berners-Lee, 2022-04-26 I can't remember the last time I read a book that was more fascinating and useful and enjoyable. Bill Bryson. Reduce your carbon footprint and understand the issue with this up-to-date life guide for carbon-conscious readers. Kirkus. Calculate your carbon footprint with an item-by-item breakdown. Meet your company's carbon goals using the latest research. Covid-19 and the carbon battle. Understand the new global supply chain. The Carbon Footprint of Everything breaks items down by the amount of carbon they produce, creating a calorie guide for the carbon-conscious. With engaging writing, leading carbon expert Mike Berners-Lee shares new carbon calculations based on recent research. He considers the impact of the pandemic on the carbon battle, especially the embattled global supply chain, and adds items we didn't consider a decade ago, like bitcoin and other cryptocurrencies. Supported by solid research, cross-referenced with other expert sources, illustrated with easy-to-follow charts and graphs, and written with Berners-Lee's trademark sense of humor, *The Carbon Footprint of Everything* should be on everyone's bookshelf. *The Carbon Footprint of Everything* is an extensively revised and updated edition of *How Bad Are Bananas*.

The New Rules of Green Marketing Jacquelyn A. Ottman, 2011-02-07 Green products

have been around since the 1970s but it's only in recent years that they've become ubiquitous. That's because savvy green marketers are no longer targeting deep green consumers with a save the planet pitch. Instead, they're promoting the added value their products provide: better health, superior performance, good taste, or cost effectiveness. In this innovative book, Ottman argues that emphasizing primary benefits is critical to winning over the mainstream consumer. Drawing on the latest poll data and incorporating lessons learned from her clients and other leading sustainable brands including GE, Nike, Method, Starbucks, Timberland, HP, NatureWorks, Procter & Gamble, Stonyfield Farm, and Wal-Mart, Ottman provides practical strategies, tools, and inspiration for building every aspect of a credible value-based green marketing strategy. She covers such topics as spurring innovation through a proactive approach to sustainability, developing products that are green throughout their life cycle, communicating credibly to avoid accusations of greenwashing, teaming up with stakeholders to maximize outreach to consumers, taking advantage of social media, and much more. **The New Rules of Green Marketing** captures the best of Ottman's two previous groundbreaking books on green marketing and places it within a 21st Century context. Focusing on a new generation of marketers who likely grew up with an appreciation for sustainability, it provides in one place essential strategies, tools, and inspiration for connecting effectively with mainstream consumers. **The Environmental Impact of Sieben Linden Ecovillage** Andrea Bocco, Martina Gerace, Susanna Pollini, 2019-01-10. The Open Access version of this book is available at <https://www.taylorfrancis.com/books/9780367145644>. It has been made available under a Creative Commons Attribution-NonCommercial-NoDerivatives 4.0 license. Environmental impact assessment is widely taught and researched but rarely covers both lifestyle and building construction in a town or neighbourhood. This book provides a broad assessment of the environmental impact of the ecovillage Sieben Linden in Germany. The ecovillage was founded in 1997 and has a population of over one hundred people. This book shows how raising the awareness of individuals and adopting a consistent way of community living can be environmentally friendly. This applies both to everyday practices and the way the houses in the ecovillage are built. The tools used to measure the impact are Ecological Footprint and Carbon Footprint methodologies, making use of indicators such as Primary Energy Intensity and Global Warming Potential. Despite the difficulties encountered by using standardised methodologies, these research tools provide an overall assessment and have allowed comparisons with selected similar cases and general values from statistical sources. This book will be of great use to professionals and scholars in the fields of environmental impact assessment, particularly at the town, district, city level, and of city and ecovillage management. It will particularly appeal to those engaged in a Sustainable Development Goal 11 perspective as well as environmental policy makers at the local level. *Doing Business in a New Climate* Paul Ling, Deborah Carlson, 2010.
