Latest Carbon Footprint:

Carbon Footprints as Cultural-Ecological Metaphors Anita Girvan, 2017-10-10 Through an examination of carbon footprint metaphors this book demonstrates the ways in which climate change and other ecological issues are culturally and materially constituted through metaphor. The carbon footprint metaphor has achieved a ubiquitous presence in Anglo North American public contexts since the turn of the millennium yet this metaphor remains under examined as a crucial mediator of political responses to the urgent crisis of climate change. Existing books and articles on the carbon footprint typically treat this metaphor as a quantifying metric with little attention to the shifting mediations and practices of the carbon footprint as a metaphor. This gap echoes a wider gap in understanding metaphors as key figures in mediating more than human relations at a time when such relations profoundly matter. As a timely intervention this book addresses this gap by using insights from environmental humanities and political ecology to discuss carbon footprint metaphors in popular and public texts. This book will be of great interest to researchers and students of environmental humanities, political ecology, environmental communication and metaphor studies.

The Carbon Footprint of Everything Mike Berners-Lee, 2022-04-26 I can't remember the last time I read a book that was more fascinating and useful and enjoyable. Bill Bryson. Reduce your carbon footprint and understand the issue with this up to date life guide for carbon conscious readers. Kirkus. Calculate your carbon footprint with an item by item breakdown. Meet your company's carbon goals using the latest research. Covid 19 and the carbon battle. Understand the new global supply chain. The Carbon Footprint of Everything breaks items down by the amount of carbon they produce creating a calorie guide for the carbon conscious. With engaging writing leading carbon expert Mike Berners-Lee shares new carbon calculations based on recent research. He considers the impact of the pandemic on the carbon battle especially the embattled global supply chain and adds items we didn't consider a decade ago like bitcoin and other cryptocurrencies. Supported by solid research cross referenced with other expert sources illustrated with easy to follow charts and graphs and written with Berners-Lee's trademark sense of humor. The Carbon Footprint of Everything should be on everyone's bookshelf. The Carbon Footprint of Everything is an extensively revised and updated edition of How Bad Are Bananas.

Ecological Footprints of Climate Change Uday Chatterjee, Angela Oyilieze Akanwa, Suresh Kumar, Sudhir Kumar Singh, Abira Dutta Roy, 2023-01-01 This book explores global implications of human activities that trigger changes in climate and the appropriate scientific adaptive and sustainable approaches as a proven information tool. It reveals that the ecological, social and economic dynamics of the changing earth encompasses huge uncertainties coupled with its ability to be linked to other forms of global change. From a scientific perspective multiple efforts are expedient to integrate the many aspects of global changes. Increases in science and technology have afforded nations the ability to plan for the future by investing in adaptive and mitigative measures to monitor present and future changes. Just as the climatic and ecological impacts of climate change are unequally distributed so is the adaptive capacity to cope with these impacts in different

nations Considering that wealth infrastructure and political stability all contribute to a nation's capacity to anticipate and respond to change So global South nations who are disadvantaged in these areas are faced with more inequalities and more unique adaptive strategies There is need for increased aggregate efforts and interaction between scientists stakeholders and policy makers to improve both decision making and global change in science Scientists and researchers need to work on expanding the range of policies that are proposed debated and implemented This way novelty new ideas and methodologies are infused into the society At this point of multiple climate footprints there is an immense need to explore all ideas evaluating their possibilities in presenting alternative futures developing alternative policies and adaptive options to solve the intractable ecological footprints of climate change

Greenhouse Gas Emissions and Terrestrial Ecosystems Amit Kumar, Jahangeer A. Bhat, Munesh Kumar, 2022-03-11
The Environmental Impact of Sieben Linden Ecovillage Andrea Bocco, Martina Gerace, Susanna Pollini, 2019-01-10
The Open Access version of this book available at <https://www.taylorfrancis.com/books/9780367145644> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license
Environmental impact assessment is widely taught and researched but rarely covers both lifestyle and building construction in a town or neighbourhood This book provides a broad assessment of the environmental impact of the ecovillage Sieben Linden in Germany The ecovillage was founded in 1997 and has a population of over one hundred people This book shows how raising the awareness of individuals and adopting a consistent way of community living can be environmentally friendly This applies both to everyday practices and the way the houses in the ecovillage are built The tools used to measure the impact are Ecological Footprint and Carbon Footprint methodologies making use of indicators such as Primary Energy Intensity and Global Warming Potential Despite the difficulties encountered by using standardised methodologies these research tools provide an overall assessment and have allowed comparisons with selected similar cases and general values from statistic sources This book will be of great use to professionals and scholars in the fields of environmental impact assessment particularly at the town district city level and of city and ecovillage management It will particularly appeal to those engaged in a Sustainable Development Goal 11 perspective as well as environmental policy makers at the local level

RECENT TRENDS IN CHEMICAL SCIENCES AND ENVIRONMENTAL SCIENCE Dr. Azad Kumar, Dr. Rajesh Kumar Singh, Dr. Yashvant Rao, 2021-11-18 Our intention in publishing this book was to discuss and interpret all of the major issues in the chemical and environmental science disciplines because this book covers such a broad range of chemical and environmental science research area Rather we have selected the themes and challenges briefly defined them and demonstrated how they connect clarified the terminology and indicated where further research may be accessed We hope that the result is an excellent introduction to chemical and environmental science It is primarily aimed towards researchers in chemical science and related fields but it should be accessible to new researchers as well We have explored into more depth on issues that have received little attention elsewhere There are several useful sources for topics such as chemical science environmental science nanotechnology ionic liquids solid waste management photodegradation Nanomaterial adsorption of hazardous metals and conducting polymers However we attempted to provide up to current knowledge we are well aware that books may soon go out of date if they seek to provide too much detail so we concentrated on basic concepts that should not go out of fashion too quickly Our book differs somewhat from other texts in the chemical and environmental sciences in its concentration We have focused on ideas and theories because we feel that a solid grasp of them will be more useful in the long run than specifics of present systems services and approaches We ve also highlighted the dimension since we feel it s critical to understand where the discipline and its components originated from and why some things are the way they are This approach is based on the research with several references provided at the end of each chapter for convenience Our intention is that the content of this book will be sufficient to provide a fundamental knowledge of the entire field and that readers will refer to the references for more information and examples of the parts of which they are most interested The conclusion words and captions as well as the important references at the conclusion of each chapter are intended to present
