110 Livingston Street Revisited Decentralization In Action:

110 Livingston Street Revisited David Rogers, Norman H. Chung, 1984-11 An extraordinarily well documented and interesting account of the problems of ethnic change in a big city school system Martin Renn Professor of Social Policy MIT and author of the *Dilemmas of Reforms and Social Policy* Even small town systems nowadays face the crisis of confidence in public education Thus the lessons learned in hammering out production relationships between school and community in New York City lessons which are admirably laid out in this new and important book become relevant to everyone concerned about the future of public education David Seeley Executive Director Public Education Association 1969 1980 and author of *Education Through Partnership*

Race and Educational Reform in the American Metropolis Dan A. Lewis, Kathryn Nakagawa, 1994-12-23

Education Reform in the American States Jerry McBeath, Maria Elena Reyes, Mary Ehrlander, 2008-04-01 Education Reform in the American States is a timely evaluation of the accountability movement in American public education culminating in the No Child Left Behind Act federal legislation of 2002 The authors treat the current accountability movement placing it in historical context and addressing the evolution in public education policymaking from the overwhelming emphasis on state and local discretion to increasing federal oversight and mandates related to federal funding They provide case studies of the educational accountability movements in nine states and analyze the factors and forces which explain progress in achievement levels as measured on standardized tests and the states prospects for meeting their NCLB targets The book and the individual case studies acknowledge the merits of NCLB while exposing several significant flaws and unintended harmful consequences of the act particularly its incentives for states to lower their standards in order to meet annual yearly progress targets and its threat to withdraw federal funds from districts with the highest percentage of disadvantaged students The audience for this study includes local state and federal education policy makers administrators and instructors in schools of education and other teaching programs educators and the general public

New York City Public Schools from Brownsville to Bloomberg Heather Lewis, 2015-04-26 When New York City mayor Michael Bloomberg centralized control of the citys schools in 2002 he terminated the citys 32 year experiment with decentralized school control dubbed by the mayor and the media as the Bad Old Days Decentralization grew out of the community control movement of the 1960s which was itself a response to the bad old days of central control of a school system that was increasingly segregated and unequal In this probing historical account Heather Lewis draws on new archival sources and oral histories to argue that the community control movement did influence school improvement in particular African American and Puerto Rican communities in the 1970s and 80s Lewis shows how educators with unique insights into the relationships between the schools and the communities they served enabled meaningful change with a focus on instructional improvement and equity that would be familiar to many observers of contemporary education reform With a resurgence of local organizing and potential challenges to mayoral control this informative history will be important reading

for today's educational and community leaders **Urban Education in the United States** J. Rury, 2005-04-30 Urban Education in the United States examines the development of schools in the large cities of the USA John Rury a well known historian of education introduces and highlights the most significant and classic essays dealing with urban schooling in this collection Urban Education in the United States will provide an introduction to critical themes in the history of city schools and will frame each section with an overview of urban education research during particular periods in US history **The Pursuit of Absolute Integrity** Frank Anechiarico, James B. Jacobs, 1996-12-15 Using anticorruption efforts in New York City to illustrate their argument Anechiarico and Jacobs demonstrate the costly inefficiencies of pursuing absolute integrity By proliferating dysfunctions constraining decision makers discretion shaping priorities and causing delays corruption control no less than corruption itself has contributed to the contemporary crisis in public administration **Education Policy for the 21st Century** Lawrence B. Joseph, 2001 Amid widespread concern that schools are failing to prepare students for workforce participation higher education and the economic and technological challenges of the twenty first century public school reform efforts across the nation have focused increasingly on standards performance and accountability A particularly critical question involves improving educational opportunities for children in poverty and for other at risk students who represent an increasing proportion of public school enrollment Education Policy for the 21st Century examines a range of key issues in standards based education reform Contributors focus on educational trends and issues in metropolitan Chicago state education policy in Illinois lessons of Chicago school reform and standards based systemic reform in other states The volume also includes chapters on standards and assessment in school accountability systems effects of school spending on student achievement and building level obstacles to urban school reform Presenting valuable data and a variety of perspectives this book illuminates both the challenges and opportunities presented by standards based education reform

Choice and Control in American Education John F. Witte, William H. Clune, 1990 Tough Liberal Richard D. Kahlenberg, 2007-08-30 In Woody Allen's 1973 film Sleeper a character wakes up in the future to learn that civilization was destroyed when a man by the name of Albert Shanker got hold of a nuclear warhead Shanker was condemned by many when he shut down the New York City school system in the bitter strikes of 1967 and 1968 and he was denounced for stirring up animosity between black parents and Jewish teachers Later however he built alliances with blacks and at the time of his death in 1997 such figures as Bill Clinton celebrated Shanker for being an educational reformer a champion of equality and a promoter of democracy abroad Shanker lived the lives of several men bound into one In his early years he was the George Washington of the teaching profession helping to found modern teacher unionism During the 1980s as head of the American Federation of Teachers he became the nation's leading education reformer Shanker supported initiatives for high education standards and accountability teacher led charter schools and a system of peer review to weed out inadequate teachers Throughout his life Shanker also fought for tough liberalism an ideology favoring public education and trade unions but also

colorblind policies and a robust anticommunism all of which Shanker believed were vital to a commitment to democracy. Although he had a coherent worldview, Shanker was a complex individual. He began his career as a pacifist but evolved into a leading defense and foreign policy hawk. He was an intellectual and a populist, a gifted speaker who failed at small talk, a liberal whose biggest enemies were often on the left, a talented writer who had to pay to have his ideas published, and a gruff unionist who enjoyed shopping and detested sports. Richard D. Kahlenberg's biography is the first to offer a complete narrative of one of the most important voices in public education and American politics in the last half century. At a time when liberals are accused of not knowing what they stand for, *Tough Liberal* illuminates an engaging figure who suggested an alternative liberal path.

Enter the Alternative School Alia R. Tyner-Mullings, 2015-11-17 *Enter the Alternative School* is an in-depth examination of public school alternatives to traditional educational models in the US. This book analyses how urban education can respond to a system growing increasingly standardised and privatised. As an example, Central Park East Secondary School (CPESS), a public alternative schooling model, successfully served predominantly low-income and minority students. It also changed the New York City public school system while promoting methods that allowed educational institutions to make changes in the lives of their students. Written by a sociologist who was both a student at CPESS and a teacher at a school developed from the CPESS model, the book analyses education from a range of vantage points, assesses outcomes, and invites readers to consider the potential of alternative educational models to address the challenges of reforms that attempt to provide quality education to the low-income and minority students otherwise underserved by public schools.
