analysis a step further to consider the larger context in which accidents occur In *To Forgive Design* he surveys some of the most infamous failures of our time from the 2007 Minneapolis bridge collapse and the toppling of a massive Shanghai apartment building in 2009 to Boston's prolonged Big Dig and the 2010 Gulf oil spill These avoidable disasters reveal the interdependency of people and machines within systems whose complex behavior was undreamt of by their designers until it was too late Petroski shows that even the simplest technology is embedded in cultural and socioeconomic constraints complications and contradictions Failure to imagine the possibility of failure is the most profound mistake engineers can make Software developers realized this early on and looked outside their young field to structural engineering as they sought a historical perspective to help them identify their own potential mistakes By explaining the interconnectedness of technology and culture and the dangers that can emerge from complexity Petroski demonstrates that we would all do well to follow their lead Cosmopolitan Helen Gurley Brown, 1995 **Australian National Bibliography**, 1994-05 **Yooper Ale Trails** Jon C.
