Jussara Falek Brauer, 2003 *Transmissão Transgeracional E a Clínica*, **A clínica fonoaudiológica em questão** Maria
Consuelo Passos, 2001 Mais uma obra que expressa o que de mais atualizado se tem na área de fonoaudiologia Os
colaboradores e a própria organizadora tratam questões como o trabalho com grupo terapêutico o discurso da objetividade e
da subjetividade na clínica fonoaudiológica a supervisão a inclusão ou exclusão do pai no atendimento e outros temas
selecionados a partir de dissertações de mestrado **Recurrent Mood Disorders** Gian F. Placidi, Liliana Dell'Osso, Giuseppe
Nistico, Hagop S. Akiskal, 2012-12-06 Current evidence indicates that over two thirds of mood disorders pursue a recurrent or
chronic course Yet much of the progress recorded in the field of mood disorders and their treatment has been in research
into the acute phase of the illness Hence there is a need for a volume that specifically addresses the special clinical problems
encountered in the recurrent forms of these disorders The various chapters of this book embrace a wide range of topics
including etiology course and long term treatment integrative reviews results of recent investigations and clinical reports In
this respect the contributions reflect current concepts research and clinical practice We have endeavored to build a bridge
between neurobiology and psychology and have covered both the psychotherapeutic and the psychopharmacologic aspects of
mood disorders *Therapy of Feto-Placental Insufficiency* B. Salvadori, 2012-12-06 The progress in biological sciences and its
applications in obstetrics in the last twenty years have formed the base for feto placental semeiotics In this way it has been
possible to diagnose placental insufficiency even in patients whose clinical conditions gave all the indications of a perfectly
normal feto placental condition On the other hand observations have shown that in certain conditions some deficiencies can
improve until normality is reached again On the basis of the above one feels justified to talk about the therapy of feto
placental insufficiency Until now this therapy has been aimed at the obstetrical pathology of the mother Our aim is to
illustrate the various steps which should be taken to execute an efficient therapy of the conditions relating to the pathology
of the fetus realizing full well that fetal pharmacology is only now being taken into consideration The various steps to be
taken the length of therapy and all the other correlated factors are still the object of individual experiences and we are
fortunate to have amongst us researchers in this field who have accepted our invitation and can supply us with their personal
experiences which can also be compared The first international symposium on the therapy of feto placental insufficiency has
been organized in conjunction with the Samil Pabryn Foundation whom I would like to thank and especially so its president
