A Study Of History Volume 12 Reconsiderations:

Lonergan and Historiography Thomas J. McPartland, 2010-04-15 Although Bernard Lonergan is known primarily for his cognitional theory and theological methodology he long sought to formulate a modern philosophy of history free of progressive and Marxist biases Yet he never addressed this in any single work and his reflections on the subject are scattered in various writings In this pioneering work Thomas McPartland shows how Lonergan's overall philosophical position offers a fresh and comprehensive basis for considering historiography Taking Lonergan's philosophy of historical existence into the realm of an epistemological philosophy of history he demonstrates how the philosopher's approach builds on the actual performance of historians and as a result integrates the insights of historical specialists into a framework of functional complementarity McPartland draws on all of Lonergan's philosophical writing as well as on the vast literature of historiography to detail Lonergan's notions of historical method historical objectivity and historical knowledge Along the way he explains what Lonergan means by hermeneutics by historical description explanation ideal types and narrative by evaluative and dialectical analyses and how these elements are all functionally related to each other He also delineates the defining features of psychohistory cultural history intellectual history history of ideas and history of philosophy indicating how these disciplines play complementary roles in the critical encounter with the past Ultimately McPartland argues that Lonergan has established the principles of a historical discipline the history of consciousness that weaves together a philosophy of consciousness with rigorous historical research to grasp long term trends resulting from differentiations of consciousness His work offers a distinct perspective on historical method that takes historical objectivity seriously while providing new insight into the thought of this important philosopher

Manning, 2003-05-15 World history has expanded dramatically in recent years primarily as a teaching field and increasingly as a research field. Growing numbers of teachers and Ph.D.s in history are required to teach the subject. They must be current on topics from human evolution to industrial development in Song dynasty China to today's disease patterns and then link these disparate topics into a coherent course. Numerous textbooks in print and in preparation summarize the field of world history at an introductory level. But good teaching also requires advanced training for teachers and access to a stream of new research from scholars trained as world historians. In this book Patrick Manning provides the first comprehensive overview of the academic field of world history. He reviews patterns of research and debate and proposes guidelines for study by teachers and by researchers in world history.

What Does a Historian Know About Jesus Christ? The Divinity of Jesus Christ. Karl Barth and Contemporary Theology of History. Tillich's Philosophy of History. Gordon Clark's Historical Philosophy. Toward a Christian Philosophy of History. Dr. Montgomery thoroughly documents his conclusions on the basis of a wide range of authorities and concludes that the only valid approach to history is from the Christian perspective: the authority of God, His Son, and His Word.
