F. Mahmood, 2010 The objective of this book is to introduce new researchers to the rich dynamical system of water waves and to show how some abstract mathematical concepts can be applied fruitfully in a practical physical problem and to make the connection between theory and experiment It provides a coherent set of lectures on the current status of water wave theory including identification of some open problems

Flipped John, 2010-04-13 Branding is done in today's business and marketing world it's all about bottom up co creation to ensure real marketing effectiveness and product success Marketing expert John Winsor makes a powerful case that instead of focusing on traditional branding efforts companies must learn to use co creation tools to work from the bottom up to create new products services and marketing strategies in collaboration with their customers Today it's all about getting out in the streets and spending time with the right customers in their worlds to create the essential foundations for breakthrough innovation He takes readers deep into this new kind of customer company relationship providing useful case studies as well as practical step by step methods to engage these key voices in dialogues that fuel real innovation Readers will learn how to develop a true bottom up co creation strategy and hone the intuition and inspiration that drive innovation

The End of Time Julian Barbour, 2001-11-29 Richard Feynman once quipped that Time is what happens when nothing else does But Julian Barbour disagrees if nothing happened if nothing changed then time would stop For time is nothing but change It is change that we perceive occurring all around us not time Put simply time does not exist In this highly provocative volume Barbour presents the basic evidence for a timeless universe and shows why we still experience the world as intensely temporal It is a book that strikes at the heart of modern physics It casts doubt on Einstein's greatest contribution the spacetime continuum but also points to the solution of one of the great paradoxes of modern science the chasm between classical and quantum physics Indeed Barbour argues that the holy grail of physicists the unification of Einstein's general relativity with quantum mechanics may well spell the end of time Barbour writes with remarkable clarity as he ranges from the ancient philosophers Heraclitus and Parmenides through the giants of science Galileo Newton and Einstein to the work of the contemporary physicists John Wheeler Roger Penrose and Steven Hawking Along the way he treats us to enticing

glimpses of some of the mysteries of the universe and presents intriguing ideas about multiple worlds time travel immortality and above all the illusion of motion *The End of Time* is a vibrantly written and revolutionary book It turns our understanding of reality inside out
