Skoda, P. Langen, 2014-05-19 FEBS Federation of European Biochemical Societies Volume 57 Antimetabolites in Biochemistry Biology and Medicine is a collection of papers that presents that advancement in the field of antimetabolites research The title first covers the use of antimetabolites in enzymology and then proceeds to tackling the consequences of analog incorporation into nucleic acids Next the selection discusses the rational approach to the use of antimetabolite in commination cancer chemotherapy an in immunosuppression The text also covers the aspects of selective antiviral action In the last part the selection details various compounds along with their synthesis and mechanisms of action The book will be of great use to researchers and practitioners of biochemistry biology and medicine **The First Miracle Drugs** John E. Lesch, 2007 In the decade from 1935 1945 while the Second World War raged in Europe a new class of medicines capable of controlling bacterial infections launched a therapeutic revolution that continues today The new medicines were not penicillin and antibiotics but sulfonamides or sulfa drugs The sulfa drugs preceded penicillin by almost a decade and during World War II they carried the main therapeutic burden in both military and civilian medicine Their success stimulated a rapid expansion of research and production in the international pharmaceutical industry raised expectations of medicine and accelerated the appearance of new and powerful medicines based on research The latter development created new regulatory dilemmas and unanticipated therapeutic problems The sulfa drugs also proved extraordinarily fruitful as starting points for new drugs or classes of drugs both for bacterial infections and for a number of important non infectious diseases This book examines this breakthrough in medicine pharmacy and science in three parts Part I shows that an industrial research setting was crucial to the success of the revolution in therapeutics that emerged from medicinal chemistry Part II shows how national differences shaped the reception of the sulfa drugs in Germany France Britain and the United States The author uses press coverage of the day to explore popular perceptions of the dramatic changes taking place in medicine Part III documents the impact of the sulfa drugs on the American effort in World War II It also shows how researchers came to an understanding of how the sulfa drugs worked adding a new theoretical dimension to the science of pharmacology and at the same time providing a basis for the discovery of new medicinal drugs in the 1940s 1950s and 1960s A concluding chapter summarizes the transforming impact of the sulfa drugs on twentieth century medicine tracing the therapeutic revolution from the initial breakthrough in the 1930s to the current search for effective treatments for AIDS and the new horizons opened up by the human genome project and stem cell research *A Study of Head Nurse Activities in a General Hospital, 1950* Apollonia Frances Olson, Helen G. Tibbitts, 1951 *Fortschritte der Arzneimittelforschung / Progress in Drug Research / Progrès des recherches pharmaceutiques* JUCKER, 2013-03-08 **Journal of the National Cancer Institute** , 1993 **United States**

Aapro,2012-12-06 The European School of Oncology came into existence to respond to a need for information education and training in the field of the diagnosis and treatment of cancer There are two main reasons why such an initiative was considered necessary Firstly the teaching of oncology requires a rigorously multidisciplinary approach which is difficult for the Universities to put into practice since their system is mainly disciplinary orientated Secondly the rate of technological development that impinges on the diagnosis and treatment of cancer has been so rapid that it is not an easy task for medical faculties to adapt their curricula flexibly With its residential courses for organ pathologies and the seminars on new techniques laser monoclonal antibodies imaging techniques etc or on the principal therapeutic controversies conservative or mutilating surgery primary or adjuvant chemotherapy radiotherapy alone or integrated it is the ambition of the European School of Oncology to fill a cultural and scientific gap and thereby create a bridge between the University and Industry and between these two and daily medical practice One of the more recent initiatives of ESO has been the institution of permanent study groups also called task forces where a limited number of leading experts are invited to meet once a year with the aim of defining the state of the art and possibly reaching a consensus on future developments in specific fields of oncology
