States Period Li Shi, The book is the volume of The History of Education in the Spring and Autumn Period and the Warring
States Period among a series of books of Deep into China Histories The earliest known written records of the history of China
date from as early as 1250 BC from the Shang dynasty c 1600 1046 BC and the Bamboo Annals 296 BC describe a Xia
dynasty c 2070 1600 BC before the Shang but no writing is known from the period The Shang ruled in the Yellow River valley
which is commonly held to be the cradle of Chinese civilization However Neolithic civilizations originated at various cultural
centers along both the Yellow River and Yangtze River These Yellow River and Yangtze civilizations arose millennia before
the Shang With thousands of years of continuous history China is one of the world's oldest civilizations and is regarded as
one of the cradles of civilization The Zhou dynasty 1046 256 BC supplanted the Shang and introduced the concept of the
Mandate of Heaven to justify their rule The central Zhou government began to weaken due to external and internal pressures
in the 8th century BC and the country eventually splintered into smaller states during the Spring and Autumn period These
states became independent and warred with one another in the following Warring States period Much of traditional Chinese
culture literature and philosophy first developed during those troubled times In 221 BC Qin Shi Huang conquered the various
warring states and created for himself the title of Huangdi or emperor of the Qin marking the beginning of imperial China
However the oppressive government fell soon after his death and was supplanted by the longer lived Han dynasty 206 BC
220 AD Successive dynasties developed bureaucratic systems that enabled the emperor to control vast territories directly In
the 21 centuries from 206 BC until AD 1912 routine administrative tasks were handled by a special elite of scholar officials
Young men well versed in calligraphy history literature and philosophy were carefully selected through difficult government
examinations China's last dynasty was the Qing 1644 1912 which was replaced by the Republic of China in 1912 and in the
mainland by the People's Republic of China in 1949 Chinese history has alternated between periods of political unity and
peace and periods of war and failed statehood the most recent being the Chinese Civil War 1927 1949 China was occasionally
dominated by steppe peoples most of whom were eventually assimilated into the Han Chinese culture and population
Between eras of multiple kingdoms and warlordism Chinese dynasties have ruled parts or all of China in some eras control
stretched as far as Xinjiang and Tibet as at present Traditional culture and influences from other parts of Asia and the

Greene, 2022-10-26 This gripping history shows how the electronic devices we use to access care influence the kind of care we receive The Doctor Who Wasn't There traces the long arc of enthusiasm for and skepticism of electronic media in health and medicine Over the past century a series of new technologies promised to democratize access to healthcare From the humble telephone to the connected smartphone from FM radio to wireless wearables from cable television to the electronic brains of networked mainframe computers each new platform has promised a radical reformation of the healthcare landscape With equal attention to the history of technology the history of medicine and the politics and economies of American healthcare physician and historian Jeremy A Greene explores the role that electronic media play for better and for worse in the past present and future of our health Today's telehealth devices are far more sophisticated than the hook and ringer telephones of the 1920s the radios that broadcasted health data in the 1940s the closed circuit televisions that enabled telemedicine in the 1950s or the online systems that created electronic medical records in the 1960s But the ethical economic and logistical concerns they raise are prefigured in the past as are the gaps between what was promised and what was delivered Each of these platforms also produced subtle transformations in health and healthcare that we have learned to forget displaced by promises of ever newer forms of communication that took their place Illuminating the social and technical contexts in which electronic medicine has been conceived and put into practice Greene's history shows the urgent stakes then and now for those who would seek in new media the means to build a more equitable future for American healthcare
