Americanist Culture History Fundamentals Of Time Space And Form:

Americanist Culture History R. Lee Lyman, Michael J. O'Brien, Robert C. Dunnell, 2013-03-07 Americanist Culture History reprints thirty nine classic works of Americanist archaeological literature published between 1907 and 1971 The articles in which the key concepts and analytical techniques of culture history were first defined and discussed are reprinted with original pagination and references to enhance the use of this collection as a research and teaching resource The editors also include an introduction that summarizes the rise and fall of the culture history paradigm making this volume an excellent introduction to the field's primary literature

The Rise and Fall of Culture History R. Lee Lyman, Michael J. O'Brien, Robert C. Dunnell, 2007-07-27 This volume presents an insightful critical analysis of the culture history approach to Americanist anthropology Reasons for the acceptance and incorporation of important concepts as well as the paradigm's strengths and weaknesses are discussed in detail The framework for this analysis is founded on the contrast between two metaphysics used by evolutionary biologists in discussing their own discipline materialistic populational thinking and essentialistic typological thinking Employing this framework the authors show not only why the culture history paradigm lost favor in the 1960s but also which of its aspects need to be retained if archaeology is ever to produce a viable theory of culture change

Time and History in Prehistory Stella Souvatzi, Adnan Baysal, Emma Baysal, 2018-10-26 Time and History in Prehistory explores the many processes through which time and history are conceptualized and constructed challenging the perception of prehistoric societies as ahistorical Drawing equally on contemporary theory and illustrative case studies and firmly rooted in material evidence this book rearticulates concepts of time and history questions the kind of narratives to be written about the past and underlines the fundamentally historical nature of prehistory From a range of multi disciplinary perspectives the authors of this volume address the scales at which archaeological evidence and narrative are interwoven from a single day to deep history and from a solitary pot to a complete city In doing so they argue the need for a multi scalar approach to prehistoric data that allows for the interplay between short and long term and for analytical units that encourage us to move continuously between scales The growing interest in time and history in archaeology and across a wide range of disciplines concerned with human action and the human past highlights that these are exceptionally active fields By juxtaposing varied viewpoints this volume bridges gaps in narrative finds a place for inclusive histories and makes clear the benefit of integrative and interdisciplinary approaches including different disciplines and types of data

Measuring the Flow of Time James A. Ford, 1999 This collection of Ford's works focuses on the development of ceramic chronology a key tool in Americanist archaeology

James A. Ford and the Growth of Americanist Archaeology Michael John O'Brien, R. Lee Lyman, 1998 Tells the story of Ford's role in the development of culture history the dominant paradigm in archaeology from 1914 through 1960 Provides a glimpse of how archaeologists began using a variety of methods to attain spatial and temporal control over an exceedingly diverse and complex archaeological record Annotation copyrighted

by Book News Inc Portland OR **Handbook of Archaeological Theories** R. Alexander Bentley, Herbert D. G. Maschner, Christopher Chippindale, 2009-09-16 This handbook a companion to the authoritative Handbook of Archaeological Methods gathers original authoritative articles from leading archaeologists on all aspects of the latest thinking about archaeological theory It is the definitive resource for understanding how to think about archaeology **Applying Evolutionary Archaeology** Michael J. O'Brien, R. Lee Lyman, 2007-05-08 Anthropology and by extension archaeology has had a long standing interest in evolution in one or several of its various guises Pick up any lengthy treatise on humankind written in the last quarter of the nineteenth century and the chances are good that the word evolution will appear somewhere in the text If for some reason the word itself is absent the odds are excellent that at least the concept of change over time will have a central role in the discussion After one of the preeminent and often vilified social scientists of the nineteenth century Herbert Spencer popularized the term in the 1850s evolution became more or less a household word usually being used synonymously with change albeit change over extended periods of time Later through the writings of Edward Burnett Tylor Lewis Henry Morgan and others the notion of evolution as it applies to stages of social and political development assumed a prominent position in anthropological disc sions To those with only a passing knowledge of American anthropology it often appears that evolutionism in the early twentieth century went into a decline at the hands of Franz Boas and those of similar outlook often termed particularists However it was not evolutionism that was under attack but rather comparativism an approach that used the ethnographic present as a key to understanding how and why past peoples lived the way they did Boas 1896 *Time, Typology, and Point Traditions in North Carolina Archaeology* I. Randolph Daniel, 2021-03-02 A reconsideration of the seminal projectile point typology In the 1964 landmark publication *The Formative Cultures of the Carolina Piedmont* Joffre Coe established a projectile point typology and chronology that for the first time allowed archaeologists to identify the relative age of a site or site deposit based on the point types recovered there Consistent with the cultural historical paradigm of the day the Coe axiom stipulated that only one point type was produced at one moment in time in a particular location Moreover Coe identified periods of cultural continuity and discontinuity in the chronology based on perceived similarities and differences in point styles through time In *Time Typology and Point Traditions in North Carolina Archaeology Formative Cultures Reconsidered* I Randolph Daniel Jr reevaluates the Coe typology and sequence analyzing their strengths and weaknesses Daniel reviews the history of the projectile point type concept in the Southeast and revisits both Coe s axiom and his notions regarding cultural continuity and change based on point types In addition Daniel updates Coe s typology by clarifying or revising existing types and including types unrecognized in Coe s monograph Daniel also adopts a practice centered approach to interpreting types and organizes them into several technological traditions that trace ancestral descendent communities of practice that relate to our current understanding of North Carolina prehistory Appealing to professional and avocational archaeologists Daniel provides ample illustrations of

points in the book as well as color versions on a dedicated website Daniel dedicates a final chapter to a discussion of the ethical issues related to professional archaeologists using private artifact collections He calls for greater collaboration between professional and avocational communities noting the scientific value of some private collections

Seriation, Stratigraphy, and Index Fossils Michael J. O'Brien, R. Lee Lyman, 2007-05-08 It is difficult for today's students of archaeology to imagine an era when chronometric dating methods were unavailable However even a casual perusal of the large body of literature that arose during the first half of the twentieth century reveals a battery of clever methods used to determine the relative ages of archaeological phenomena often with considerable precision Stratigraphic excavation is perhaps the best known of the various relative dating methods used by prehistorians Although there are several techniques of using artifacts from superposed strata to measure time these are rarely if ever differentiated Rather common practice is to categorize them under the heading stratigraphic excavation This text distinguishes among the several techniques and argues that stratigraphic excavation tends to result in discontinuous measures of time a point little appreciated by modern archaeologists Although not as well known as stratigraphic excavation two other methods of relative dating have figured important in Americanist archaeology seriation and the use of index fossils The latter like stratigraphic excavation measures time discontinuously while the former in various guises measures time continuously Perhaps no other method used in archaeology is as misunderstood as seriation and the authors provide detailed descriptions and examples of each of its three different techniques Each method and technique of relative dating is placed in historical perspective with particular focus on developments in North America an approach that allows a more complete understanding of the methods described both in terms of analytical technique and disciplinary history This text will appeal to all archaeologists from graduate students to seasoned professionals who want to learn more about the backbone of archaeological dating

Human Expeditions Andre Costopoulos, Stephen Chrisomalis, 2013-01-01 *Human Expeditions* pays tribute to Trigger's immense legacy by bringing together cutting edge work from internationally recognized and emerging researchers inspired by his example
