Ghostly Ruins Harry Skrdla, 2006-09-28 With *Ghostly Ruins* author Harry Skrdla guides your tour of thirty abandoned locations from around the country homes and hotels power plants and prisons whole neighborhoods and even entire towns These are the happy memories of your grandparents and great grandparents childhoods such as the United Artists movie palace in Detroit the rollercoasters at Chippewa Lake Park in Medina Ohio and the Palace of Fine Arts from the Chicago World's Fair And then there are the structures that were massive and forbidding even at their peaks before falling to disrepair the Bethlehem Steel Mill and Eastern State Penitentiary in Pennsylvania and Bannerman's Castle a munitions depot stranded on a lonely island in upstate New York Even the works of some of our nation's most revered architects are not impervious to decay Witness Albert Kahn's Packard Plant and Philip Johnson's New York State Pavilion Perhaps eeriest of all are the ghost towns of Bodie California and Centralia Pennsylvania where a trash fire in a nearby mine exploded into an underground inferno in 1962 The fire still blazes today Skrdla shows you all this and more telling the tale of each place in its prime and the story behind its fall accompanied by more than two hundred photographs depicting these locations at both yesterday's historic heights and today's decrepit depths **BOOK JACKET**

Unbuilt America Forgotten Architecture in the United States from Thomas Jefferson to the Space Age Alison Sky, 1976 **American Architects and the Mechanics of Fame** Roxanne Kuter Williamson, 2014-03-07 Why does one talented individual win lasting recognition in a particular field while another equally talented person does not While there are many possible reasons one obvious answer is that something more than talent is requisite to produce fame The something more in the field of architecture asserts Roxanne Williamson is the association with a famous architect at the moment he or she first receives major publicity or designs the building for which he or she will eventually be celebrated In this study of more than six hundred American architects who have achieved a place in architectural histories Williamson finds that only a small minority do not fit the right person right time pattern She traces the apprenticeship connection in case studies of Louis Sullivan Frank Lloyd Wright Henry Hobson

Richardson the firm of McKim Mead White Latrobe and his descendants the Bulfinch and Renwick Lines the European immigrant masters and Louis Kahn Although she acknowledges and discusses the importance of family connections the right schools self promotion scholarships design competition awards and promotion by important journals Williamson maintains that the apprenticeship connection is the single most important predictor of architectural fame She offers the intriguing hypothesis that what is transferred in the relationship is not a particular style or approach but rather the courage and self confidence to be true to one s own vision Perhaps she says this is the case in all the arts American Architects and the Mechanics of Fame is sure to provoke thought and comment in architecture and other creative fields
