American Strategy In World War II A Reconsideration:

American Strategy in World War II Kent Roberts Greenfield, 1963 An examination of the eight major decisions made by U S and Britain for conducting the War **American Strategy in World War 2** Kent Roberts Greenfield, 1979

American Airpower Strategy in World War II Conrad C. Crane, 2016-04-05 Resistance is a product of will times means Carl von Clausewitz postulated in his treatise *On War* In his 1993 *Bombs Cities and Civilians* which the American Historical Review judged must reading for anyone interested in the subject of air warfare Conrad C Crane focused on the moral dimension of American air strategy in World War II specifically the Allied effort to break the enemy's will through targeting civilians With decades of research and reflection and a wealth of new material at his command Crane returns to the subject of America's WWII airpower strategy to offer an analysis fully engaged with the means side of Clausewitz's equation the design and impact of strategic bombing of the enemy's infrastructure and thus its capacity to fight A marked advance in our understanding of the use of airpower in war in general and the Second World War in particular Crane's work shows how despite an undeniable lack of concern about civilian casualties in Germany and Japan late in the war American strategic bombing in WWII consistently focused on destroying the enemy's war making capacity instead of its collapsing will Further Crane persuasively argues that in the limited wars since then separating such targets has become increasingly more difficult and all air campaigns against states have subsequently escalated to accept greater risks for civilians *American Airpower Strategy in World War II* also provides an expanded close look at the use of airpower in the last three months of the strategic air war against Germany when so many bombing missions relied upon radar aids as well as the first direct comparison of 8th and 15th Air Force bombing campaigns in Europe The result is the most coherent and concise analysis of the application and legacy of Allied strategic airpower in WWII and a work that will inform all future practical and theoretical consideration of the use and the role of airpower in war *Makers of Modern Strategy from Machiavelli to the Nuclear Age* Peter Paret, Gordon A. Craig, Felix Gilbert, 2010-10-01 Authoritative and convincing New York Times Book Review The classic reference on the theory and practice of war The essays in this volume analyze war its strategic characteristics and its political and social functions over the past five centuries The diversity of its themes and the broad perspectives applied to them make the book a work of general history as much as a history of the theory and practice of war from the Renaissance to the present *Makers of Modern Strategy from Machiavelli to the Nuclear Age* takes the first part of its title from an earlier collection of essays that became a classic of historical scholarship Three essays are repinted from the earlier book while four others have been extensively revised The rest twenty two essays are new The subjects addressed range from major theorists and political and military leaders to impersonal forces Machiavelli Clausewitz and Marx and Engels are discussed as are Napoleon Churchill and Mao Other essays trace the interaction of theory and experience over generations the evolution of American strategy for instance or the emergence of revolutionary war in the modern world Still others analyze the strategy

of particular conflicts the First and Second World Wars or the relationship between technology policy and war in the nuclear age Whatever its theme each essay places the specifics of military thought and action in their political social and economic environment Together the contributors have produced a book that reinterprets and illuminates war one of the most powerful forces in history and one that cannot be controlled in the future without an understanding of its past

Determination And Effectiveness Of Wwii Strategic Bombing Strategy Colonel T. Tracey Goetz, 2014-08-15 With the collapse of France in 1940 American US and British UK leadership became keenly aware that the continued security of their nations required the defeat of the Axis powers particularly Germany The Allies chose a strategy utilizing a combination of various military actions most notably a combined bomber offensive CBO The CBO would be carried out through a combination of US daylight precision and UK night area bombing The purpose of this paper is to show why the Allies chose this strategy and evaluate its success To accomplish this task the paper will first describe the events that brought about the conflict and the strategy Crowl s Questions are used as a framework to analyze the factors that influence strategy development and adoption and will illustrate why Allied leaders chose this path This is followed by a detailed description of the campaign The principles of war mass objective offensive maneuver surprise security simplicity unity of command and economy of force are accepted as proven methods for employing forces in combat and are used to evaluate the CBO s effectiveness The paper closes with a summary of the findings and doctrinal implications The paper will show the Allies adopted US daylight precision and UK night area bombing based on leadership s belief that it could most effectively reduce Germany s means of war and hasten its earliest possible defeat The Allies successfully achieved this objective primarily through adherence to the principles of mass objective offensive and maneuver

The American Military Mission to China, 1941-1942 William G. Grieve, 2014-01-23 This is an overview of America s first effort in military aid to a foreign sovereign nation at a time when Europe was engaged in open warfare Asia was facing a series of military confrontations and most of the world thought global conflagration was inevitable The work offers insight into the impact of war in Burma a backwater of World War II and examines events that result when great powers go to great lengths to further their own goals The work also examines disagreements among China the United Kingdom the United States and Japan and shows the evolution of aid provision to another country and changing expectations as new information arises

MacArthur's Jungle War Stephen R. Taaffe, 1998 His book tells not only how victory was gained through a combination of technology tactics and army navy cooperation but also how the New Guinea campaign exemplified the strategic differences that plagued the Pacific War since many high ranking officers considered it a diversionary tactic rather than a key offensive

Democracies and Small Wars Efraim Inbar, 2003 By their nature democracies clearly have greater constraints than autocratic regimes on their freedom of action as they have to meet constitutional legal and moral criteria in their use of force This collection analyses a number of case studies showing how democracies have won small wars
