Domestic Problems Abby Morton Diaz, 1875 Gross Domestic Problem Lorenzo Fioramonti, 2013-01-17 Gross domestic product is arguably the best known statistic in the contemporary world and certainly amongst the most powerful It drives government policy and sets priorities in a variety of vital social fields from schooling to healthcare Yet for perhaps the first time since it was invented in the 1930s this popular icon of economic growth has come to be regarded by a wide range of people as a problem After all does our quality of life really improve when our economy grows 2 or 3 per cent Can we continue to sacrifice the environment to safeguard a vision of the world based on the illusion of infinite economic growth Lorenzo Fioramonti takes apart the content of GDP what it measures what it doesn't and why and reveals the powerful political interests that have allowed it to dominate today's economies In doing so he demonstrates just how little relevance GDP has to moral principles such as equity social justice and redistribution and shows that an alternative is possible as evinced by the de-growth movement and initiatives such as transition towns A startling insight into the politics of a number that has come to dominate our everyday lives
