A Different Country:

A Different Country Lúcio Vinhas de Souza, 2008 Russia is now once again one of the ten largest economies in the world representing around 70% of Germany's GDP in purchasing power parity in 2007 In addition Russia is the third largest trading partner of the EU the fourth largest trade partner of the eurozone and an essential energy supplier to the EU This recovery makes Russia an economic and political actor that cannot be ignored In this authoritative new book Lúcio Vinhas de Souza desk officer for Russia in the Directorate General for Economic and Financial Affairs of the European Commission reviews the country's evolving macroeconomic performance and structural policy framework from the difficult days of the recession in the early transition period and the 1998 crisis to Russia's sustained and robust growth since 1999 He outlines the remaining reform priorities in Russia and concludes with pragmatic policy recommendations for the reform agenda

A DIFFERENT COUNTRY: MANUAL FOR TRADE AND BUSINESS Javier Clemente Engonga Avomo, When you live among slanderers you learn not to think or be like them Not everyone lives in Equatorial Guinea in a hurry to steal and go live abroad and that is why those who slander do it with the misuse of their bad imagination When I write about my country I do so with the peace of mind that I do not have any secret account or any hidden assets abroad bought with public money like most of the Equatoguinean sons of the People with whom I always identify myself Since always those inside and those outside have tried to invent any movie about me because they do not know me at all and I do not frequent groups of fools and I do not want to meet them either because I know them all well enough from afar Not everyone is here to waste time or to talk about things that contribute nothing to the socio economic industrial and technological development of our country my Guinea Politics is a very convenient excuse for those who do not know how to do anything else but slander steal and hide and for those who want to do the same afterwards That is why in my opinion the poor as is the case of most of our population in terms of their purchasing power compared to the cost of living must always be given the reason even if they do not have it because everything else is already being taken away from them which is their real wealth And I always reiterate that if a government does not make its people rich and prosperous it is not because it cannot but because it does not want to or does not know how and I am not saying it Confucius is saying it and he is not wrong The true wealth of a country is measured in the level of satisfaction of its population and not only in festive moments or in bars Socioeconomic satisfaction creates political stability socioeconomic dissatisfaction creates political instability there has never been any state country or region that has had political stability with socioeconomic dissatisfaction As long as we do not understand this we will continue to jump dance and sing and drink beers but we will not create a different history if we do not do things differently as a different country This endeavor to create poverty in Africa by force is the stupidest system of creating problems for oneself i.e. self sabotage It gets murkier when the governed people get used to being spoon fed directly into their mouths creating a chronic dependency on subsidies and anything of the same nature But when you assert condemn criticize point out and even ridicule

all the efforts made in the country to overcome underdevelopment it is simply because you have no idea what it takes to build a Nation When I write about my country Equatorial Guinea I do so with all the tranquility of someone who knows he owes nothing to anyone like many in my country It is very easy to talk for the sake of talking when you do not know how to do anything and that is what is called doing politics in Equatorial Guinea I recommend those who do not know how to do anything and just talk for the sake of talking to first learn something productive for themselves and for the country and then if they want and have nothing to do instead of doing nothing better write something who knows maybe they will manage to fix their world That is the difference between wisdom and necessity between those who think and those who only invent and that is one of the defects that affect the development of our small country everybody is an expert in everything but nobody is a specialist in anything much less in practice Experience makes a person an expert or not in a subject No one is born knowing everything just as no one becomes an expert in anything overnight One of the real problems in developing countries is that everything is left to the last minute and inexperience is the mother of all failures This is the first volume of the Handbook for Trade and Entrepreneurship in Equatorial Guinea Thank you for reading these lines Javier Clemente Engonga
