Building As An Economic Process An Introduction To Building Economics:

Building as an Economic Process Ranko Bon, 1989-01-01 *Construction Economics* Danny Myers, 2013-01-17

Construction Economics provides students with the principles and concepts underlying the relationship between economic theory and the construction industry The New Approach adopts an argument that economics is central to government initiatives concerning sustainable construction This edition has been revised to explain the effects of the current economic crisis on the construction industry In addition sections relating to less developed countries the economics of sustainable development and theories relating to a firm's bid strategy have all been rewritten With new data examples initiatives readings glossary items and references the third edition of this established core text builds on the strengths of the previous edition a clear and user friendly style use of a second colour to highlight important definitions and formulae regular summaries of key points a glossary of key terms extensive use of tables and figures extracts from the academic journal Construction Management and Economics to consolidate and prompt discussion reviews of useful websites This invaluable textbook is essential reading across a wide range of disciplines from construction management and civil engineering to architecture property and surveying

Research Companion to Construction Economics Ofori, George, 2022-03-15 This innovative Research Companion considers the history nature and status of construction economics and its need for development as a field in order to be recognised as a distinct discipline It presents a state of the art review of construction economics identifying areas for further research

Modern Construction Economics Gerard de Valence, 2010-11-10 Traditional building economics has primarily been concerned with issues around project appraisal and cost management techniques On the other hand modern construction economics has a wider focus with stronger links to mainstream economics reflecting an increased interest in a range of theoretical issues in construction economics both at the macro and micro level In Modern Construction Economics Theory and Application a variety of approaches are used to present a coherent vision of synthesis between industry economics and project economics Topics covered include developing construction economics as industry economics competition and barriers to entry in construction innovation in construction theory testing in construction management research collusion and corruption in the construction sector Including contributions from academics in the UK Sweden Hong Kong and Australia this is a truly global review of a core issue for the construction industry worldwide The result is a unique book that will push toward the development of a comprehensive theoretical framework of construction economics This is a must read for all serious students of construction economics and all practitioners looking for a deeper understanding of their industry

Economic Structure and Maturity: Collected Papers in Input-output Modelling and Applications Ranko Bon, 2024-12-11 This title was first published in 2000 A collection of Ranko Bon's papers on input output analysis and its applications The underlying feature of the papers is a focus on the supply side input output model which better predicts the behaviour of mature economic sectors such as agriculture

and mining than the demand sided model The construction sector is especially relevant in the context of economic stability and maturity issues as it offers an index of economic maturity for entire economies This is the main theme that evolves through the papers collected in the book **The Future of International Construction** Ranko Bon,David Crosthwaite,2000 Acknowledgements Introduction Conceptual framework The international construction market The future of international construction the annual surveys Conclusions References Appendices The ^AOxford Encyclopedia of Economic History Joel Mokyr,2003-10-16 What were the economic roots of modern industrialism Were labor unions ever effective in raising workers living standards Did high levels of taxation in the past normally lead to economic decline These and similar questions profoundly inform a wide range of intertwined social issues whose complexity scope and depth become fully evident in the Encyclopedia Due to the interdisciplinary nature of the field the Encyclopedia is divided not only by chronological and geographic boundaries but also by related subfields such as agricultural history demographic history business history and the histories of technology migration and transportation The articles all written and signed by international contributors include scholars from Europe Latin America Africa and Asia Covering economic history in all areas of the world and segments of economies from prehistoric times to the present The Oxford Encyclopedia of Economic History is the ideal resource for students economists and general readers offering a unique glimpse into this integral part of world history Journal of Economic Literature ,1991 Facilities Management and the Business of Space Wes McGregor,2007-10-25 Essential reading for building owners facilities managers architects and surveyors this book will also prove useful on business management and facilities management courses and for those studying architecture surveying and real estate management **The Impact of Overbuilding on People and the Planet** David A. Ness,2019-02-01 This book challenges the status quo where profligate building and urban development is described as green and low carbon exposing a number of elephants in the big green room that severely impact upon society and the environment It questions the ethics equity and sustainability of continued growth of the building stock in industrialized contexts amid diminishing demand whilst the developing world is deprived of basic resources and infrastructure Even a circular built environment may not go far enough when dramatic reduction in consumption of resources is required to meet sufficient service levels More socio economic value may be derived from built resources by their stewardship adaptation reuse and equitable sharing while ameliorating the adverse impacts of overconsumption By taking a wider perspective of a sustainable built environment the text illustrated by case studies from the Olympics and nine countries reframes the policy debate and reforms current approaches through a new theory and manifesto It will appeal to policy makers architects urban designers educators students and green building practitioners
