At a s life and travels The second set of teachings consists of aphorisms known as the Seven Point Mind Training meant to be used as contemplative practices to develop compassion and transform the mind These selections show not only the foundational texts of the Kadam tradition but also the widespread impact these teachings continued to have across traditions

The Heart of Buddhist Meditation ,1988 **Neuroenhancement: how mental training and meditation can promote epistemic virtue.** Barbro Fröding,Walter Osika,2015-08-31 This book explores how one can bring about changes in the brain through meditation both through attention focus training and through compassion training Recent findings in the natural sciences have confirmed that it is possible for humans to achieve these structural and functional changes through various life style practices It is argued that meditation enables us to influence some aspects of our biological make up and for example could boost our cognitive flexibility as well as our ability to act compassionate Such changes are likely to facilitate the instilling of a number of epistemic virtues which have great bearing on our quality of life This book offers the reader an accessible introduction to a set of neuro enhancement methods with a special focus on meditation techniques and explores how such practices could contribute to make us better decision makers and improve our moral virtues The book is suitable for anyone looking for a text discussing the effects of neuro enhancement from a secular ethics perspective The Compassionate Mind Approach to Overcoming Anxiety Dennis Tirsch,2012-01-19 We know what it s like to worry from time to time but for some of us our worrying can take over and have a serious impact on our lives When our anxiety gets out of hand and starts to dominate our lives affecting how we function and our general sense of wellbeing it s time to do something about it This accessible self help guide provides the reader with a clear understanding of how problem anxiety develops the kinds of problems it s causing them and sets out ground breaking Compassion Focused Therapy CFT techniques to overcome their anxiety CFT was initially developed by Professor Paul Gilbert OBE author of the bestselling The Compassionate Mind which set out his ground breaking approach to treat those with high levels of shame and self criticism It uses the proven research based techniques of CBT and other therapies with a special focus on the importance of developing inner compassion in order to alleviate feelings of shame develop a more balanced outlook and promote resilience It incorporates elements of mindfulness and Tibetan Buddhism with recent research on human development and studies of the brain It is increasingly used to treat a wide range of emotional and psychological problems including depression overeating shyness trauma anxiety and anger
