Construction Safety Management Systems Steve Rowlinson, 2004-04-29 The construction industry has a distressingly poor safety record whether measured in absolute terms or alongside other industries The level of construction safety in a country is influenced by factors such as variations in the labour forces shifting economies insurance rates legal ramifications and the stage of technological development Yet the problem is a world wide one and many of the ways of tackling it can be applied across countries Effective tools include designing preplanning training management commitment and the development of a safety culture The introduction and operation of effective safety management systems represents a viable way forwards but these systems are all too rarely implemented How can this be done Should we go back to prescriptive legislation This book considers these questions by drawing together leading edge research papers from the proceedings of an international conference conducted by a commission W099 on Safety and Health on Construction Sites of CIB the international council of building research organisations
