mapping of broad changes in Maori society particularly their survival as a people The book raises general theoretical questions about how populations react to the introduction of diseases to which they have no natural immunity Another more general theoretical issue is what happens when one society's development processes are superseded by those of some more powerful force whether an imperial power or a modern day agency which has ingrained ideas about objectives and strategies for development Finally it explores how health and development interact The Maori experience of contact and colonization lasting from 1769 to circa 1900 narrated here is an all too familiar story for many other territories and populations Natives and former colonists This book provides a case study with wider ramifications for theory in colonial history development studies demography anthropology and other fields **New Zealand Prime Ministers , 'True Biographies of Nations?'** Karen Fox,2019-04-17 Dictionaries of national biography are a long established and significant genre of biographical and historical writing existing in many forms across the globe This book brings together practitioners from around the English speaking world to reflect on national biographical dictionary projects recent cultural journeys and the challenges presented to them by such developments as the transition to a digital environment a new alertness to the need to represent diversity and the rise of transnationalism Exploring their paths forward the chapters of this book collectively make a powerful argument for the continued value and importance of large scale collaborative biographical dictionary research Literary Research and the Literatures of Australia and New Zealand Faye H. Christenberry,2010-11-19 Literary Research and the Literatures of Australia and New Zealand Strategies and Sources is a research guide to the literatures of the two major countries of Oceania Australia and New Zealand Covering over 200 years of these geographically and chronologically connected countries this guide contains references to many different types of resources illustrating how the researcher is best served by using the increasing variety of research tools in combination with each other The book emphasizes research methodology and outlines the best practices for the research process paying special attention to the unique challenges inherent in conducting research on the literatures of Australia and New Zealand specifically The book includes commentary on general literary reference materials library catalogs print and online bibliographies indexes and annual reviews scholarly journals contemporary reviews period journals and newspapers microform and digital collections manuscripts and archives and web resources It is an essential tool for anyone conducting research on Australia or New Zealand and it is a helpful guide for readers with a special interest in these countries literatures **The Practice of Sustainable Tourism** Michael Hughes,David Weaver,Christof Pforr,2015-06-19 Sustainable tourism is a widely used term that has accumulated considerable attention from researchers and policy makers over the past two decades However there is still an apparently wide gap between theory and practice in the area Recent scholarly research has tended to focus on niche areas of alternative tourism rather than address the broader issues and vagaries and paradoxes that appear to plague the broader notion of sustainable tourism As such there is a need for a new and pragmatic analysis of sustainable tourism as an overarching idea

and how this manifests in practice The Practice of Sustainable Tourism fulfils this need by offering a fresh perspective on sustainable tourism as an umbrella concept with inherent tensions It presents a way of thinking about tourism based on the notion of finding common ground using the dialectic tradition of philosophy Dialectics focusses on resolving opposing viewpoints by recognising they have common elements that can be combined into a rational and practical solution over time As part of this approach the book examines the strongly apparent tensions within alternative tourism as well as the paradox of continuing growth and other mass tourism related issues It is divided into three parts Part I includes chapters discussing the general concept of sustainable tourism its history current status and possible futures Part II includes a range of destination case studies exploring how sustainable tourism has been applied and Part III includes perspectives from the tourism operator view Given the international content and challenging themes the book will be appealing internationally to students researchers and academics in the fields of tourism geography sustainability and social science
