An Agenda of Science for Environment and Development into the 21st Century J. C. I. Dooge, G. T. Goodman, J. W. M. Rivi re, J. Marton-Lef vre, T. O'Riordan, 1992-05-28 This volume brings together the understanding and the judgment of the world's scientific community on the issues of highest priority for the future of the environment and development. It looks beyond the state of the art and formulates the environment and development research agenda and identifies the scientific knowledge base that will be needed for rational policy decisions during the coming decades. Diverse topics such as population, land use, energy, and global cycles are covered under sixteen themes that have been grouped into three sections: Problems of Environment and Development, Scientific Understanding of the Earth System, and Responses and Strategies.

Environmental Science and Engineering for the 21st Century National Science Board (U.S.). Task Force on the Environment, 2000 *Agendas for Sustainability* Mary MacDonald, 2002-03-11 *Agendas for Sustainability* considers the processes used for devising global environment and development agendas and provides practical suggestions for their future development and influence. A collaboration of the latest research from the Stockholm Environment Institute and the Earth Council, the book presents similarities and differences in problem definition, objectives, principles, priorities, and actions across eleven of the major agendas put forward for environment and development after Rio. Points of divergence and areas of common ground are investigated for over 30 environment and development related topics such as biodiversity, consumption patterns, trade, urbanization, population, education, deforestation, and water resources. *Marine Science & Technology in China: A Roadmap to 2050* Jianhai Xiang, 2010-08-04 As one of the eighteen field-specific reports comprising the comprehensive scope of the strategic general report of the Chinese Academy of Sciences, this sub-report addresses long-range planning for developing science and technology in the field of marine science. They each craft a roadmap for their sphere of development to 2050. In their entirety, the general and sub-group reports analyze the evolution and laws governing the development of science and technology, describe the decisive impact of science and technology on the modernization process, predict that the world is on the eve of an impending S/T revolution, and call for China to be fully prepared for this new round of S/T advancement. Based on the detailed study of the demands on S/T innovation in China's modernization, the reports draw a framework for eight basic and strategic systems of socio-economic development with the support of science and technology, work out China's S/T roadmaps for the relevant eight basic and strategic systems in line with China's reality, further detail S/T initiatives of strategic importance to China's modernization, and provide S/T decision makers with

comprehensive consultations for the development of S T innovation consistent with China s reality Supported by illustrations and tables of data the reports provide researchers government officials and entrepreneurs with guidance concerning research directions the planning process and investment Founded in 1949 the Chinese Academy of Sciences is the nation s highest academic institution in natural sciences Its major responsibilities are to conduct research in basic and technological sciences to undertake nationwide integrated surveys on natural resources and ecological environment to provide the country with scientific data and consultations for government s decision making to undertake government assigned projects with regard to key S T problems in the process of socio economic development to initiate personnel training and to promote China s high tech enterprises through its active engagement in these areas
