Issues in Cardiology Irene D. Turpie, George A. Heckman, 2012-12-06 Aging Issues in Cardiology provides an overview of the practical clinical areas involved in managing cardiovascular disease in the elderly This volume will be useful to any physician managing the cardiovascular health of elderly individuals Topics covered include Delirium in Elderly Cardiac Patients Depression Pharmacologic Issues Primary Prevention Syncope Heart Failure Coronary Revascularization *Aging and Heart Failure* Bodh I. Jugdutt, 2014-02-19 This book synthesizes the major research advances in molecular biochemical and translational aspects of aging and heart failure over the last four decades and addresses future directions in management and drug discovery It presents clinical issues and molecular mechanisms related to heart failure including the changing demographics in the aging population with heart failure hypertension and prevention of diastolic heart failure in the aging population polypharmacy and adverse drug reactions in the aging population with heart failure changes in the heart that accompany advancing age from humans to molecules aging associated alterations in myocardial inflammation and fibrosis and aging related changes in mitochondrial function and implications for heart failure therapy The book succinctly summarizes the large volume of data on these key topics and highlights novel pathways that need to be explored Featuring contributions from leading clinician scientists *Aging and Heart Failure Mechanisms and Management* is an authoritative resource on the major clinical issues in heart failure therapy in the elderly for cardiologists gerontologists and internists

Cardiovascular Disease in the Elderly Thorsten M. Leucker, Gary Gerstenblith, 2023-01-01 The second edition of this book updates reviews and discusses the latest findings on the pathophysiology diagnosis and management of cardiovascular disease in the older patient It explains the physiological changes associated with the normal aging process that may lead to the development of disease to adverse consequences once disease develops and which alter the risk benefit equation for medical and other interventions designed to diagnose assess and treat cardiovascular disease Chapters address key issues in the management of cardiovascular disease in the elderly including prevention coronary artery disease valvular disease hypertensive disease arrhythmias and interventions Wherever possible the authors take an evidence based approach to recommendations and rely heavily on clinical trials The value of lifestyle changes in the aging population the use of primary and secondary prevention strategies treatments and complications are also discussed *Cardiovascular Disease in the Elderly* offers physicians and other related providers who care for older patients a gold standard approach to understanding and managing cardiovascular disease in this group **Aging, Heart Disease, and Its Management** Niloo M.

Edwards,2002-11-14 Reviews the best therapies and surgical techniques available to provide quality care for the elderly cardiac patient and of those areas that require further research The authors detail preventive therapies and the cardiovascular syndromes that disproportionately afflict the older individual including arrhythmias particularly atrial fibrillation syncope heart failure particularly diastolic heart failure and ischemic heart disease They also delineate the surgical management of the heart patient with discussions of postoperative management and its complications and of specific surgical procedures such as coronary artery bypass grafting valve surgery pacemaker and defibrillators and surgical management of heart failure

Antioxidants and Cardiovascular Disease Martial G. Bourassa,Jean-Claude Tardif,2006-03-10 Chronic oxidative stress is associated with the aging process and often leads to the development of disorders such as cancer and arterial disease Cardiovascular conditions in which oxidation damage has been strongly implicated include atherosclerosis myocardial ischemia and reperfusion coronary restenosis diabetes mellitus and congestive heart failure

Antioxidants and Cardiovascular Disease Second Edition covers three major topics 1 the first seven chapters review the oxidative modification hypothesis and its close relationship to lipid metabolism and to the pathogenesis of atherosclerosis 2 the next four chapters describe the different compounds nutrients and supplements with antioxidant properties and their mechanisms of action 3 and finally the last ten chapters discuss the potential benefits of antioxidants in overall cardiovascular prevention including hypertension diabetes mellitus dyslipidemias and in the treatment and prevention of specific conditions such as chronic coronary artery disease restenosis after percutaneous coronary intervention and chronic heart failure

Antioxidants and Cardiovascular Disease Second Edition is written by recognized experts in the fields of atherosclerosis heart failure and antioxidants It should be of interest to medical students and fellows researchers and practicing physicians There has been rapid progress in our knowledge in this field during the last two to three years Thus the current reedition appears timely For instance this second edition captures several recently reported and published clinical trials as well as new information on diabetic and hypertensive cardiovascular disease
