Agrodiversity Learning From Farmers Acrob The World:

Agrodiversity H. C. Brookfield, Helen Parsons, Muriel Brookfield, 2003 While most academic literature emphasizes the accelerated loss of biodiversity this book describes how large numbers of smallholder farmers are conserving biodiversity in their farmland and surrounds *In situ conservation of agricultural biodiversity on-farm: lessons learned and policy implications* , Caribbean Land and Development Revisited J. Besson, J. Momsen, 2007-06-25 The book is an interdisciplinary collection of fifteen essays with an editorial introduction on a range of territories in the Commonwealth Francophone and Hispanic Caribbean The authors focus on land and development providing fresh perspectives through a collection of international contributing authors *Learning Agrobiodiversity* , 2009 Environmental Planning in the Caribbean Janet Momsen, 2016-12-05 Illustrated by case studies from both smaller nations such as Carriacou Barbados and St Lucia and larger countries including Cuba Mexico and Jamaica this volume brings together leading writers on environmental planning in the Caribbean to provide an interdisciplinary contemporary critical overview They argue that context is central to the practice of environmental planning in this region Rather than focusing on a deterministic colonial geography and history the contributors propose that whilst a wide range of foreign planning influences can be felt in different contexts environmental planning emerges in specific settings through the fluid interaction between local and global relations of power A number of chapters explore the effects of external discourses upon the region while others examine discourses on Western style democracy and tourism Other important themes covered include participatory planning urban planning physical development planning pest management sustainable development water pollution conservation and ecotourism **Climate and Land Degradation** Mannava VK Sivakumar, Ndegwa Ndiang'ui, 2007-10-11 In many parts of the world climatic variations are recognized as one of the major factors contributing to land degradation impacting on agricultural systems performance and management To accurately assess sustainable land management practices the climate resources and the risk of climate related or induced natural disasters in a region must be known Only when climate resources are paired with management or development practices can the land degradation potential be assessed and appropriate mitigation technologies be developed This book is based on an International Workshop held in Arusha Tanzania and should be of interest to all organizations and agencies interested in sustainable land management to arrest land degradation **On Farm Conservation of Agricultural Biodiversity in Nepal: Managing diversity and promoting its benefits** Bhuwon Ratna Sthapit, 2005 **Agrobiodiversity - a training manual for farmer groups in East Africa** Food and Agriculture Organization of the United Nations, 2018-06-26 Farmers play a crucial role in the preservation and sustainable use of agrobiodiversity In fact the diversity of species that support our current agricultural production systems has been carefully managed and shaped by farming communities over the course of the history of humankind Farmers act as custodian of the Earth s agrobiodiversity resources and play a big part in preserving traditional plant and animal varieties

and the knowledge associated with these FAO has long been working on promoting approaches to agriculture that enable both the sustainable use of biodiversity resources for food and agriculture and their conservation and on supporting farmers to make informed decisions on their farm management and production practices This training manual fits in this broader commitment to support a shift towards a paradigm of agricultural production that can sustain food and nutrition security while at the same time cause the least harm to natural ecosystems The manual is intended as an introduction to agricultural biodiversity and to its relevance to different aspects of agricultural production and management for smallholder farmers in Kenya It includes eight different training modules each covering a specific aspect related to agrobiodiversity The modules are standalone and can be used independently one from the other depending on the user s or project s aim The materials were originally prepared within the FAO Netherlands Partnership Programme FNPP and have been updated revised and published under the second phase of the European Union funded project Capacity building related to multilateral environmental agreements MEAs in Africa Caribbean and Pacific ACP countries
