Aids In Africa And The Caribbean:

AIDS in Africa and the Caribbean George Clement Bond, John Kreniske, Ida Susser, Joan Vincent, 2019-04-09 This book offers detailed ethnographic studies from Africa and the Caribbean to explain AIDS in a global and comparative third world context The essays move beyond medical or epidemiological models explaining the epidemic in its economic social political and historical contexts

AIDS in Africa V. Lovell, 2002 This book examines the epidemic of AIDS in Africa poses questions about the practical and ethical possibilities of making HIV cocktails available on a wide scale and provides an up to date bibliography on AIDS in Africa

Points to Consider David Gisselquist, 2008 Since the early 20th century when HIV began to circulate among humans blood exposures during healthcare have contributed to the transmission of the virus Despite all the money and attention directed at HIV AIDS in the past several decades these risks have remained The book asks why and seeks answers to a number of crucial questions How much of the worst HIV epidemics are from blood exposures Why have these risks persisted And what is to be done *Points To Consider* looks to the future and recommends new strategies that people and governments can adopt to ensure that healthcare and cosmetic services do not transmit HIV and to reliably stop the worst HIV AIDS epidemics

David Gisselquist has published more than a dozen articles in medical journals on HIV epidemics in Africa and India with special attention to risks to transmit HIV through health care He has traveled and worked in Africa and Asia and has assisted field research on HIV in India and Kenya He co edited a collection of country studies on injection practices *Pilot Testing the WHO Tools to Assess and Evaluate Injection Practices* published by WHO 2003 and has spoken at WHO and at international AIDS conferences Dr Gisselquist holds a PhD in economics with experience in anthropology and rural development He is an independent consultant

Cordial Relations Between Africa and America in the Twenty-First Century Lazarus Jawiyambe, 2018-03-20 Since the 1960s the United States of America and African nations have had a rocky relationship Lazarus Jawiyambe explores why the U S A has so often been at odds with the continent Many times he argues the relationship has suffered because of misunderstandings The results of these misunderstandings however have been profound with many African nations opting to mainly deal with other powers including the former Soviet Union the European Union and China Both sides the author says would be well served if they could work together for the good of all Africa could be an even more vital economic and strategic partner if American leaders treated African nations the same way they do Europe Asia and the Pacific Rim To move the relationship to a higher more constructive level the leaders of America and African countries must engage in regular dialogue and meetings the author says No matter where you live youll be enlightened by how American and African leaders could improve life for everyone with the insights analysis and recommendations in *Cordial Relations between Africa and America in the Twenty First Century*

The Elusive African Renaissance George Klay Kieh, Jr., 2018-09-12 Africa faces several major development challenges that have adversely affected the political and material well being of the majority of the people living there This

collection of new essays rigorously analyzes those frontier development issues including democracy leadership the economy poverty alleviation through microfinance schemes food security education health and political instability and offers prescriptions that differ from the dominant neoliberal solutions *Federal Register*, 2003-12 Counseling People of African Ancestry Elias Mpofu, 2011-06-27 This volume advances a uniquely Afro centric sociocultural understanding of health maintenance and risk reduction in African cultural heritage populations It unites a diverse group of leading African and Africanist scholars in an exploration of common cultural values in African heritage communities and their practical applications in contemporary counseling The chapters highlight the prominent health issues faced in Africanist settings today and use real world experiences to illustrate core lessons for effective community action The approach spans complex cultural milieus from diversity counseling to conflict resolution Each chapter includes field based experiential tasks discussion boxes research boxes and case studies which serve as valuable resources in both coursework and casework Counseling People of African Ancestry is an essential primer for community health workers counselors and educators seeking a better understanding of African cultural heritage settings to promote community health well being and development

International Public Health Michael H. Merson, Robert E. Black, Anne Mills, 2005 Public Health Plagues in World History John Aberth, 2011-01-16 Plagues in World History provides a concise comparative world history of catastrophic infectious diseases including plague smallpox tuberculosis cholera influenza and AIDS Geographically these diseases have spread across the entire globe temporally they stretch from the sixth century to the present John Aberth considers not only the varied impact that disease has had upon human history but also the many ways in which people have been able to influence diseases simply through their cultural attitudes toward them The author argues that the ability of humans to alter disease even without the modern wonders of antibiotic drugs and other medical treatments is an even more crucial lesson to learn now that AIDS swine flu multidrug resistant tuberculosis and other seemingly incurable illnesses have raged worldwide Aberth's comparative analysis of how different societies have responded in the past to disease illuminates what cultural approaches have been and may continue to be most effective in combating the plagues of today Rights of Passage Mark B. Salter, 2003 This work explores shifting notions of sovereignty citizenship and identity as well as changing concerns with issues of race class gender and nation Ranging from topics such as health war and migration the text sheds light on the role of borders in the age of globalization
