Arnott, 2006-11-20 Consultant eye surgeon Eric Arnott was one of the original pioneers of small incision surgery He was the first to perform modern Phaco surgery in Europe and designed lens implants that have restored the sight to millions of patients The word autobiography is simply insufficient to describe this book which is a remarkable testament to the life works and marriage of a remarkable man The book details the original invention of the lens implant by Harold Ridley who Eric worked with in his early years of medical training It goes on to follow the development of small incision Phaco surgery instigated by Charlie Kelman and the disinterest and contempt held by the peers of these ophthalmologic pioneers The author describes every advance in this field of ophthalmology in fascinating detail The importance to Eric of religion spirituality family life and helping others less fortunate than himself is reinforced in this enthralling and at times very amusing read Arnott draws you into his narrative rousing thoughts of disbelief as you are compelled to continue reading each new chapter and event in his life proving as fascinating as the last Entertaining and illuminating A New Beginning in Sight provides a detailed history of ophthalmology and is essential reading for ophthalmologists other specialists and non specialists alike **World Commercial Aircraft Accidents, 1946-1992** Chris Y. Kimura, 1993 *Command in NATO*

After the Cold War Thomas-Durell Young, 1997 The publication of this compendium could not be more timely as a contribution to the debate which continues in NATO capitals NATO is an alliance based on consensus It is also the most effective military alliance in history this is largely due to the existence of its integrated and multinational command structure That command structure the cement of the Alliance as it were derives from the mutual obligations contained in Article V of the North Atlantic Treaty This contractual obligation which does not exist for the other missions which have arisen since 1990 means that the defence of NATO territory must be the basis of any restructuring If we were to move away from this and thus weaken the command structure even with the best intentions then it is my firm conviction that we would do serious harm to the Alliance and its future On the other hand a modified command structure still based on the Article V contractual obligation provides a firm basis as well as flexibility versatility and availability for any non contractual namely out of area requirement Command structures do not exist of their own accord They come into being change and develop to permit commanders at the appropriate level from top to bottom to orchestrate the application of military force at sea in the air and on land There is however a limit to which one can impose responsibilities on commanders who after all are personally responsible for the conduct of operations and a limit to the amount of specialisation and detail with which they can cope This is why we have hierarchical command structures with each commander dealing with the appropriate level of competence It is why at certain levels command should be joint and at others purely functional How many levels of command are needed will be dictated by the operations factors of time forces and space
