Aggregation and Disaggregation in the Social Sciences Michael T. Hannan,1991 *Problems of Aggregation and Disaggregation in Sociological Research* Michael T. Hannan,1970 *Aggregation and Disaggregation in Sociology* Michael T. Hannan,1971 **Economics and sociology: towards an integration** T. Huppes,2013-12-01 In recent years economics has been the subject of increasingly severe criticism It has failed both to predict and to counteract the economic crisis now afflicting nearly the whole Western world Economic life is more disrupted than ever the rate of inflation has risen alarmingly unemployment has not been as high since the 1930s economic growth is stagnating there is increasing opposition to the inequality in the distribution of income and wealth on a national scale as well as in the world at large the process of economic integration EEC GATT UNCTAD is being thwarted programmes of economic development in the third world have not produced the desired effects etcetera Obviously it would not be fair to put the blame for the crisis on economic science But the present predicament does call for serious consideration of the limitations of economic explanation Among the social sciences economics is unquestionably the most advanced discipline Its very sophistication however leads it to abstract from social phenomena such as norms institutions power conflict and social change Thus the manifest influence of sociological variables on the course of economic processes remains hidden Dominating this book as a drumbeat is the conviction held by the several authors that a clearer grasp of the current problems may be obtained if economists and sociologists are prepared to co operate more closely An interdisciplinary approach is warranted the distinction between the social sciences should be less sharply drawn **A Critical Dictionary of Sociology** Raymond Boudon,François Bourricaud,1989 This distinguished reference work is much more than a lexicon or ordinary dictionary Each essay complete with bibliographical references presents a selective and critical discussion of some issue fundamental to sociology Synthesizing American British French and German taken together these contributions provide a coherent and sophisticated critique of the sociological tradition **An Introduction to Causal Analysis in Sociology** Ian Birnbaum,1981-02-19 **What Has Sociology Achieved?** Henk A. Becker,Christopher G.A. Bryant,2016-07-27 In an age when continued financial and other support for teaching and research in sociology cannot be taken for granted sociologists have been surprisingly slow to provide a clear statement of the achievements of sociology in the western world since 1950 What Has Sociology Achieved does this by assembling twelve essays specially commissioned from distinguished authors to which the editors add an introduction setting out the issues and a concluding chapter which draws together recurrent themes *Ethnomethodology and the Human Sciences* Graham Button,1991-08-30 Through its empirical inquiries into the ordered properties of social action this text demonstrates how ethnomethodology provides a radical respecification of the foundations of the human sciences an achievement that has often been misunderstood *Social, Ecological and Environmental Theories of Crime* Jeffery T. Walker,2017-07-05 One of the oldest and most extensive forms of criminology falls within what is referred to among other names as social ecology

Beginning with the work of Guerry and Quetelet this theory became the dominant paradigm in explaining crime with the work of the Chicago School in the early 1900s social disorganization theory and neighborhood research attempting to deal with crime in deteriorating cities Social ecology is also the basis for the research being conducted in environmental criminology This volume offers a selection of the most influential works in social ecology and environmental criminology It begins with research from human ecology and the Chicago School extending through some of the research in social disorganization theory It encompasses some of the major journal articles from the 1980s and 1990s in neighborhoods and crime and then addresses some of the quintessential works in environmental criminology It ends with groundbreaking work in this area that may indicate the future direction of the field This valuable collection includes an excellent introduction by Jeff Walker

*Causal Models in the Social Sciences* H.M. Blalock Jr., 2017-07-28 Causal models are formal theories stating the relationships between precisely defined variables and have become an indispensable tool of the social scientist This collection of articles is a course book on the causal modeling approach to theory construction and data analysis H M Blalock Jr summarizes the then current developments in causal model utilization in sociology political science economics and other disciplines This book provides a comprehensive multidisciplinary picture of the work on causal models It seeks to address the problem of measurement in the social sciences and to link theory and research through the development of causal models Organized into five sections Simple Recursive Models Path Analysis Simultaneous Equations Techniques The Causal Approach to Measurement Error and Other Complications this volume contains twenty seven articles eight of which were specially commissioned Each section begins with an introduction explaining the concepts to be covered in the section and links them to the larger subject It provides a general overview of the theory and application of causal modeling Blalock argues for the development of theoretical models that can be operationalized and provide verifiable predictions Many of the discussions of this subject that occur in other literature are too technical for most social scientists and other scholars who lack a strong background in mathematics This book attempts to integrate a few of the less technical papers written by econometricians such as Koopmans Wold Strotz and Fisher with discussions of causal approaches in the social and biological sciences This classic text by Blalock is a valuable source of material for those interested in the issue of measurement in the social sciences and the construction of mathematical models
