## **Aging And The Nervous System:**

*The Process of Aging in the Nervous System* James E. Birren, 1959      **Pathology of the Aging Human Nervous System** Serge Duckett, J. C. de la Torre, 2001-05-17 This book is a concise and practical compendium of neuropathological information for all professionals whose responsibility it is to make diagnoses care and help elderly humans afflicted with neurological and or psychiatric disorders The term neuropathology includes a multitude of disciplines including pathology histology genetics immunology biochemistry radiology etc This disciplinary approach is reflected in this book This new edition has been completely revised and brought up to date from the 20th to the 21st century Basic neuroscientists were invited to contribute chapters explaining and describing basic scientific principles underlying the neuropathological disciplines Also additional information is provided concerning medic legal issues neuropharmacology and a list of support groups for the elderly neurologically or mentally impaired in Brazil Canada Germany the United Kingdom and the USA

Aging and the Nervous System Salvatore Giaquinto, 1988-01-15 With modern advances in health care prolonging the average life span rehabilitation programs for the elderly are of increasing importance This book examines not only techniques for maintaining an older person s quality of life but also the process of rehabilitating those in whom the brain is damaged providing an authoritative account of the structural and neuropsychological changes that occur in the aging nervous system whether healthy or diseased It discusses such timely topics as the relationship between aging and dementia cognitive activity and personality neuropsychological training and medical treatment in a social context      **Aging of the Autonomic Nervous System** Francesco Amenta, 1993-06-16 Aging of the Autonomic Nervous System is the first book devoted to the aging of the autonomic nervous system The book presents the most recent findings on topics such as general aspects of the autonomic nervous system main neurotransmitter systems age dependent changes of neuroeffector mechanisms in target organs and therapeutic perspectives It also provides a comprehensive analysis of the possible consequences of these findings Aging of the Autonomic Nervous System will be a useful volume for gerontologists and neuroscientists      Model Systems of Development and Aging of the Nervous System Antonia Vernadakis, Alain M.

Privat, Jean M. Lauder, Paola S. Timiras, 2012-12-06 The last decade has generated a multitude of studies using in vitro model systems to explore growth and differentiation of the nervous system Although the findings have been exciting and have revealed unique properties of neural cells considerable concern continues to be expressed regarding the significance of in vitro findings in terms of their applicability to in vivo biological events To examine this issue further a group of scientists presented and discussed their findings at a conference sponsored by the Institute of Developmental Neuroscience and Aging held in Crete Greece 26-29 May 1985 The conference was cosponsored by the University of Crete and was generously supported by the Ministry of Research and Technology of Greece Tourism Organization of Greece and also Sandoz and FIDIA The Directors of the Institute of Developmental Neuroscience and Aging are indebted to these Institutions for their support

For the success of this conference the Directors owe much to Drs Eleni Fleischer Lambropoulos and Yiannis Tsouderos who spent countless hours in making arrangements so that the participants would have not only a scientific but also a unique cultural experience Several chapters of this book focus on the complex phenomena of neurogenesis and gliogenesis and the modulation of neuronal differentiation The concept that neuronal differentiation has both genetic and epigenetic components is documented by elegant studies using both in vitro cultured cells and neurons transplanted in vivo

*Neurogerontology* James F. Willott, PhD,1999-07-25 Neurogerontology tells the story of how the aging brain affects all aspects of cognition and physical performance It comprehensively links the principles and substance of neuroscience with gerontology and psychology Written largely from a behavioral neuroscience perspective Neurogerontology explores the functional relationships between the central nervous system and psychological phenomena of aging including perception arousal learning cognition and motor behavior Willot emphasizes healthy aging but dementia and other pathological conditions are discussed when relevant This evidence based approach to the neuroscience of aging makes this a valuable reference for professionals as well as an informative textbook for students in gerontology courses

**Aging of the Central Nervous System** V. V. Frolkis,V. V. Bezrukov,1979-11-16

**Development and Aging in the Nervous System** Morris Rockstein,2012-12-02 Development and Aging in the Nervous System covers the proceedings of a series of symposia by the same title held at the University of Miami Training Program in Cellular Aging on February 19 20 1973 This book is composed of 11 chapters that specifically consider aging in its total sense from embryonic development through senescence of a vital organ system of the body The introductory chapters review the age changes in the neuronal microenvironment and the regulative mechanism of neuronal death in cell number control in the nervous system The next chapters deal with the neuronal degeneration in aging mammals the selected changes in the developing postnatal rat and the trophic influences in the mammalian central nervous system These topics are followed by discussions of the genesis of neuronal locus specificity the vertebrate brain aging and the neurochemical patterns in the developing and aging brain The remaining chapters describe the mechanisms of enzymatic differentiation in the brain and in cultured cells and the monoamine metabolism in the aging male mouse This book will prove useful to development and cell biologists researchers and advance students
