Bombers Aircrew Experience:

The Bomber Aircrew Experience Philip Kaplan, 2016-06-07 Discover the wartime experiences of the bomber boys in World War II Flying bombers during World War II was a harrowing ordeal Unlike the fighter jocks who pit their skill and wits against each other in agile aerial combat the bomber boys had to endure the fear and savagery of the air war with grim acceptance their only option to sit and take it Manning lumbering machines that could not maneuver or defend themselves effectively the aircrews had to rely on tight aircraft formations and their own bravery to survive the onslaught of enemy fighters and anti aircraft artillery Within these great planes they developed bonds like no other young men thrust together in a shared fate risking their lives in slow moving yet beautiful and powerful aircraft over the skies of numerous war zones thousands of feet above the battlegrounds but no further away from the horrors Fully illustrated with hundreds of color and black and white photographs as well as dozens of interviews Philip Kaplan's *The Bomber Aircrew Experience* offers an intimate glimpse into the life and times of these wartime airmen The bomber boys recount their harrowing missions over Germany's industrial heartland paving the way for Allied victory in the Second World War's European Theatre Discover what it was like to man such planes as the great Flying Fortress and the Liberator and what it was like for the British and Commonwealth boys flying night missions in the Lancasters Halifaxes and Stirlings And then finally learn about the development of the modern stealth bombers the F 117 Nighthawk and the B 2 Spirit Skyhorse Publishing as well as our Arcade imprint are proud to publish a broad range of books for readers interested in history books about World War II the Third Reich Hitler and his henchmen the JFK assassination conspiracies the American Civil War the American Revolution gladiators Vikings ancient Rome medieval times the old West and much more While not every title we publish becomes a New York Times bestseller or a national bestseller we are committed to books on subjects that are sometimes overlooked and to authors whose work might not otherwise find a home *V Bombers* Tony Redding, 2025-11-04 A sobering and necessary read for all those interested in Cold War history Much has been written about the V bombers the Valiant Victor and Vulcan but virtually nothing has been said about their strategic nuclear strike role How would Britain's small force of subsonic bombers have retaliated following a Soviet attack Would they have succeeded in visiting thermonuclear catastrophe on their Soviet targets *V Bombers* Britain's Nuclear Frontline is the first detailed account of the operational capability and credibility of Britain's airborne nuclear deterrent during the peak years of the Cold War This book is the product of six years of research by the author Dr Tony Redding It includes a great deal of fresh material on V force weapons war mission targeting vulnerabilities and tactics for attacking targets within Soviet Russia Over 70 V force aircrew and ground crew were interviewed and over 300 operational research reports and other official documents were reviewed This book demonstrates how the V bombers retained a unilateral capacity to destroy the largest cities in the Soviet Union until the handover of the strategic nuclear deterrent to the Polaris submarines in 1969 It concludes that a small force of surviving V bombers could

have unleashed the explosive power of all Allied bombs dropped on Germany in six years of war but in the space of the first two hours of World War 3 A sobering thought and a fascinating and necessary read for all those interested in this period of history

D-Day Bombers Stephen Darlow, 2014-07-19 This book is largely an eye witness account of the heavy bomber contribution to the success of the D Day landings and therefore to the winning of the war in Europe It is told using considerable first hand experience from the veterans of the campaign something not really covered in any other books on the subject together with background information from primary source documents on the tactics and strategy employed Eight different aircrews five RAF and three USAAF tell widely differing stories of operations before during and after D Day Their vivid and dramatic accounts are supplemented by numerous contributions from other aircrew and ground crew veterans army personnel and French civilians which have been carefully gathered by Stephen Darlow from interviews with veterans and their relatives through correspondence and contemporary diaries Certain raids have been selected and described in detail and there are numerous previously unpublished photographs As Winston Churchill wrote This is no war of chieftains or of princes of dynasties or national ambition it is a war of peoples and of causes There are vast numbers not only in this island but in every land who still render faithful service in the war but whose names will never be known whose deeds will never be recorded Here is their story sixty years on

Master Bombers Sean Feast, 2012-09-26 The wartime exploits and experiences of an RAF bomber pathfinder squadron are recounted in this WWII history A stunning war book Oxford Times UK Formed in July 1942 the Pathfinder Force was the corps d elite of the Royal Air Force s Bomber Command The Squadrons of the PFF were tasked with marking targets and leading bomber formations to the right place at the right time And the best of the force formed the crews of the master bombers the aircraft in charge of the whole attack It took nerves of steel for the crew to linger high over the target area often for hours in constant fear of attack from fighters or flak In Master Bombers aviation historian Sean Feast shares the wartime stories of the men and women of No 582 Squadron This bomber pathfinder squadron was formed in April of 1944 and began operations with a night raid on Occupied France a week later The aircrew and supporting staff of No 582 distinguished themselves in numerous operations with one pilot Ted Swales winning a posthumous Victoria Cross over Pforzheim

The Bombers and the Bombed Richard Overy, 2015-04-28 An essential part of the literature of World War II Jonathan Yardley The Washington Post From acclaimed World War II historian Richard Overy comes this startling new history of the controversial Allied bombing war against Germany and German occupied Europe In the fullest account yet of the campaign and its consequences Overy assesses not just the bombing strategies and pattern of operations but also how the bombed communities coped with the devastation This book presents a unique history of the bombing offensive from below as well as from above and engages with moral questions that still resonate today

RAF Fighters vs Luftwaffe Bombers Andy Saunders, 2020-11-26 The Battle of Britain was a fight for survival against a seemingly unstoppable foe With the German army poised to invade only the fighters of the Royal Air Force

stood between Hitler and the conquest of Britain Losses were high on both sides but the Spitfires Hurricanes Havocs and Defiants of the RAF began to take their toll on the overextended under protected Kampfgruppen of Heinkel He 111s Junkers Ju 87s and 88s and Dornier Do 17s Both sides learned and adapted as the campaign went on As the advantage began to shift from the Luftwaffe to the RAF the Germans were forced to switch from round the clock bombing to only launching night raids often hitting civilian targets in the dreaded Blitz This beautifully illustrated study dissects the tactics and technology of the duels in this new kind of war bringing the reader into the cockpits of the RAF fighters and Luftwaffe bombers to show precisely where the Battle of Britain was won and lost

The Fear in the Sky Pat Cunningham,2012-09-19 A vivid account of the experiences of 10 men who volunteered to risk their lives on air operations during World War II Pennant Magazine A profound respect for the RAF aircrews of the Second World War led aviation historian Pat Cunningham DFM to record the experiences of ten men who volunteered to risk their lives on air operations for some time Britain s only effective method of striking back These young men came from disparate backgrounds but having qualified in their specialist categories were skillfully merged as interdependent crew members A staggering 8 305 of the 55 573 men killed in RAF Bomber Command alone died in accidents showing that enemy action was only one of the hazards aircrews faced Others included technical malfunctions notwithstanding that each had implicit faith in their supporting ground personnel The constant pressure to get aircrews operational saw many completing the required thirty bombing sorties with less than 500 hours experience Even so they were required to navigate over hostile blacked out terrain in uncertain weather and with few radio aids in machines packed with highly volatile substances Hardly surprising then that fear was a concomitant of the job I was scared throughout every single operation says one and if any operational aircrew member says different I d say they were either liars or that age has mellowed their memories Bomber Command experiences over Central Europe feature largely but also included are maritime operations to furnish the all important meteorological reports two crew airborne interception radar sorties virtual suicide attacks by outmoded torpedo bombers against enemy capital ships operations in support of the Chindits Long Range Penetration Force in Burma and German POW incarceration that culminated with a three month death march ahead of the advancing Soviets The crew is the essential element throughout yet as the narratives show not all gelled seamlessly Surprisingly however individual traits actually strengthened the bond and gave every aircrew its special quality Praise for **The Fear in the Sky** An assembly of ten autobiographical accounts by Bomber Command aircrew retelling of their experiences and very hairy many of them are There are many personal touches drawn from their first forays in uniform right up to the end of their tour of duty sometimes in a German POW camp The stories make a lively read **The Bulletin**

The Science of Bombing Randall Thomas Wakelam,2009-06-25 After suffering devastating losses in the early stages of the Second World War the United Kingdom s Royal Air Force established an Operational Research Section within bomber command in order to drastically improve the efficiency of bombing missions targeting Germany In **The Science of Bombing**

Randall Wakelam explores the work of civilian scientists who found critical solutions to the navigational and target finding problems and crippling losses that initially afflicted the RAF Drawing on previously unexamined files that re assess the efficacy of strategic bombing from tactical and technical perspectives Wakelam reveals the important role scientific research and advice played in operational planning and how there existed a remarkable intellectual flexibility at Bomber Command A fascinating glimpse into military strategy and decision making The Science of Bombing will find a wide audience among those interested in air power history as well as military strategists air force personnel and aviation historians **Bomber Crew** James Taylor, Martin Davidson, 2012-03-01 Long after the Battle of Britain the aircrews of RAF Bomber Command risked their lives night after night during the Second World War Over 55 000 of the airmen never returned from these missions a further 10 000 became prisoners of war And yet Bomber Command has been mired in controversy and its veterans all volunteers have never been awarded a campaign medal Their crucial contribution to the outcome of the war has all too often been overlooked BOMBER CREW exposes the bravery of these men using gripping first person testimony from the surviving pilots and crew For them this was a time of incredible hardship and adrenaline courage and friendship and their stories bear witness to the strength of the human spirit in times of incredible danger Never before has their story been so vividly told This is also a revealing look at the history of Bomber Command itself from the early days through to eventual victory in 1945 From the terrifying action of the bombing raids to the intimate personal accounts of heroism tragedy and triumph this is the ultimate account of these brave men and their contribution to the Allied victory
