A stand alone reference book on interest rate swaps, the money markets, financial market mathematics, interest rate futures and technical analysis. Includes introductory coverage of very specialised topics for which one previously required several texts such as VaR, Asset liability management and credit derivatives. Combines accessible style with advanced level topics. **The Money Markets**

Handbook Moorad Choudhry, 2011-12-02 In The Money Markets Handbook Moorad Choudhry provides in one comprehensive volume the description, trading analysis and calculations of the major markets around the world, providing worked examples and exercises throughout to provide a landmark publication on this important topic. Unique features including a list of conventions and trading rules in virtually every market in the world means that this book is relevant to virtually every money market in the world. Includes an in depth treatment of repo markets, asset and liability management, banking regulatory requirements and other topics that would usually be found only in separate books. Written with clarity in mind, this book is vital reading for anyone with an interest in the global money markets. Features coverage of derivative money market products including futures and swaps and the latest developments not covered in current texts. **Bank**

Asset and Liability Management Moorad Choudhry, 2011-12-27 Banks are a vital part of the global economy and the essence of banking is asset liability management (ALM). This book is a comprehensive treatment of an important financial market discipline. A reference text for all those involved in banking and the debt capital markets, it describes the techniques, products and art of ALM. Subjects covered include bank capital, money market trading, risk management, regulatory capital and yield curve analysis. Highlights of the book include detailed coverage of Liquidity gap and funding risk management, Hedging using interest rate derivatives and credit derivatives, Impact of Basel II, Securitisation and balance sheet management, Structured finance products including asset backed commercial paper, mortgage backed securities, collateralised debt obligations and structured investment vehicles and their role in ALM, Treasury operations and group transfer pricing. Concepts and techniques are illustrated with case studies and worked examples. Written in accessible style, this book is essential reading for market practitioners, bank regulators and graduate students in banking and finance. Companion website features online access to software on applications described in the book including a yield curve model.
