Bombs Cities And Civilians American Airpower Strategy In World War II:

American Airpower Strategy in World War II Conrad C. Crane, 2016-04-05 Resistance is a product of will times means Carl von Clausewitz postulated in his treatise *On War* In his 1993 *Bombs Cities and Civilians* which the American Historical Review judged must reading for anyone interested in the subject of air warfare Conrad C Crane focused on the moral dimension of American air strategy in World War II specifically the Allied effort to break the enemy's will through targeting civilians With decades of research and reflection and a wealth of new material at his command Crane returns to the subject of America's WWII airpower strategy to offer an analysis fully engaged with the means side of Clausewitz's equation the design and impact of strategic bombing of the enemy's infrastructure and thus its capacity to fight A marked advance in our understanding of the use of airpower in war in general and the Second World War in particular Crane's work shows how despite an undeniable lack of concern about civilian casualties in Germany and Japan late in the war American strategic bombing in WWII consistently focused on destroying the enemy's war making capacity instead of its collapsing will Further Crane persuasively argues that in the limited wars since then separating such targets has become increasingly more difficult and all air campaigns against states have subsequently escalated to accept greater risks for civilians **American Airpower Strategy in World War II** also provides an expanded close look at the use of airpower in the last three months of the strategic air war against Germany when so many bombing missions relied upon radar aids as well as the first direct comparison of 8th and 15th Air Force bombing campaigns in Europe The result is the most coherent and concise analysis of the application and legacy of Allied strategic airpower in WWII and a work that will inform all future practical and theoretical consideration of the use and the role of airpower in war

Strategic Bombing by the United States in World War II Stewart Halsey Ross, 2015-10-03 The United States relied heavily on bombing to defeat the Germans and the Japanese in World War II and air raids were touted as precision bombing in American propaganda But was precision possible over cloud covered Europe or a darkened Japanese countryside Could the vaunted Norden optical bombsight in fact drop bombs into pickle barrels as advertised Were the American aircrews well trained and well protected How good were their airplanes What were the results of the costly raids This work sets suppositions against facts surrounding the United States use of strategic bombing in World War II Chapters cover the events leading up to World War II the start of the war the seers and the planners the airplanes bombs bombsights and aircrews the planes Germany used to defend itself against American planes the five cities Hamburg Dresden Tokyo Hiroshima and Nagasaki that experienced the most destruction and the U S Strategic Bombing Survey of the damage done by aerial bombing The book also probes the government's myth building statements that supported America's view of itself as a uniquely humanitarian nation and analyzes the role played by interservice rivalry battleship admirals against bomber generals

Bombs, Cities, and Civilians Conrad C. Crane, 1993 As the might and capabilities of American airpower have grown during the last 60 years so has the controversy about its use in the intentional and indiscriminate

wartime bombardment of civilians In Bombs Cities and Civilians Conrad Crane maintains that for the most part American airmen in World War II remained committed to precision bombing doctrine Instead of attacking densely populated urban areas simply to erode civilian morale Army Air Forces adhered to a policy that emphasised targeting key industrial and military sites He demonstrates that while the British Germans and Japanese routinely conducted indiscriminate aerial bombardment of enemy cities American airmen consistently stayed with daylight raids against carefully selected targets especially in Europe Daytime precision missions were usually far more dangerous than night area attacks but such Army Air Forces tactics increased bombing efficiency and also reduced the risk of civilian casualties

The Oxford Handbook of World War II G. Kurt Piehler, Jonathan A. Grant, 2023 World War II dramatically transformed human life and society resulting in the deaths of 100 million people and shaping the worldview and psyches of generations The Oxford Handbook of World War II broadens traditional narratives of the war and in the process changes our understanding of this epic conflict Spanning the rise and fall of the Versailles system to the postwar reintegration of veterans and the eventual commemoration of the conflict and its victims The Oxford Handbook of World War II marks a landmark contribution to the historical literature of war

Bombing, States and Peoples in Western Europe 1940-1945 Claudia Baldoli, Andrew Knapp, Richard Overy, 2011-06-30 This is the first book to treat bombing during WWII as a European phenomenon and not just the Blitz on Britain and Germany With Western Europe now at the heart of a united continent it is even more difficult to explain how only 70 years ago European states destroyed much of the urban landscape from the air There were many blitzes between 1940 and 1945 with an estimated 700 000 people killed The purpose of this book is to provide the basis for a comparison of the experience of western states under the impact of bombing In particular it considers the political cultural and social responses to bombing rather than the military strategic and social dimensions which have formed the core of the discussion hitherto This book will correct the popular perception of the British Blitz as the key bombing experience by exposing the reality of life under the bombs for communities as far apart as Brest Palermo and Rostock An international panel of historians consider the issues raised amidst the bombing of human rights and protection of civilians in this seminal event in 20th history

Encyclopedia of War and American Society Peter Karsten, 2006 Publisher description

Voices of World War II Priscilla Roberts, 2012-08-22 Drawing together a wide variety of primary source documents from across the United States Europe and Asia this book illuminates the events and experiences of World War II the most devastating war in human history World War II was the most destructive and disruptive war ever a global conflict that in one way or another affected the lives of people across the planet Voices of World War II Contemporary Accounts of Daily Life coalesces a wide variety of primary source documents drawn from across the United States Europe and Asia Supplemented by interpretive material that enables readers to analyze them assess their impact and significance and place them in context to comparable situations today the documents provide rare insights into World War II Expert commentaries and additional information on these texts enable a

greater understanding of the background to these documents providing valuable training in learning to interpret assess and evaluate historical sources Intended primarily for upper level high school and undergraduate level history students general readers will also appreciate the variegated array of primary material from World War II which depicts numerous aspects of the conflict often in extremely personal terms

Airpower Pioneers John Andreas Olsen,2023-01-15 Airpower Pioneers studies twelve especially influential airmen detailing their impact on the evolution of the United States Air Force USAF Rather than focus on command in a series of air campaigns this book describes the personal qualities and careers of people who distinguished themselves first and foremost by advancing airpower theory doctrine and strategy and in certain cases by implementing significant organizational changes in the USAF structure Some held important positions during wartime but except for a few who excelled in both combat and peace those selected for inclusion in this volume made their main contributions to advancing aerospace power away from the front line as planners organizers educators and strategists The future of aerospace power requires airmen not only to push the limits in combat but also to emphasize publicly and frequently what is special and vital about airpower The distinctive characteristics of airpower speed range flexibility precision and lethality have improved with every new generation of aircraft and weapon systems The history of modern warfare is full of empirical evidence of airpower s relevance Looking ahead the main challenge for air forces all over the world is to match advances in technology with new ideas All air forces need visionary men and women whose reach exceeds their grasp who are determined to adapt to new security and defense realities rather than adhere to romanticized ideas of yesteryear and whose organizational skills ensure successful implementation of new ideas despite inevitable resistance to change

Cataclysm Herman S. Wolk,2010 The B 29 long range bombing campaign against the Japanese home islands dictated unprecedented organization and command hence Arnold established the Twentieth Air Force commanded by himself from Washington and reporting directly to the Joint Chiefs of Staff This new type of bombing offensive distinct in command organization range and weapons from the European experience also called for exemplary operational combat leadership in the field Here Arnold excelled in his command of the AAF relieving a long time colleague Hansell in favor of a hard nosed operator LeMay This crucial move was a turning point in the Pacific war Although the Soviet declaration of war on Japan was a factor in the Japanese surrender it was the atomic bomb that politically shocked the Japanese to capitulation Arnold the architect of the bombing offensive emphasized that Japan was already defeated in the summer of 1945 by the bombing and blockade and that it was not militarily necessary to drop the atomic bomb
